The Adanson Collection

PRINTED BOOKS

Abrégé Des Instructions Sur Le Jardinage ... cf. AD 13

AD 1 Académie Royale des Sciences [Paris] *Prix*
80 pp. Paris, Imprim. Royale [imprint often missing.]
Baudouin, Impr. de l'Institut National, 1747–1801.

A collection of 26 announcements of the prizes offered by or through l'Académie Royale des Sciences or l'Institut National de France, or reports on the awards of same. Apparently Adanson filed the different prizes by subjects, so there are gaps in this assemblage. Included are the prizes for 1782 on cotton and for 1789 on a regional mineralogy for which Lucien Scheler elucidated the history (Antoine-Laurent Lavoisier et Michel Adanson rédacteurs de programmes des Prix à l'Académie des Sciences. In *Rev. d'Hist. Sci.* 14: 257–284. 1961.)

AD 2 ADANSON, Aglaé (1775–1852) *Catalogue des arbres, arbrisseaux, arbustes et plantes vivaces, cultivés ... à Baleine, près Moulins, ...*
[iii], 128 pp. Paris, Audot, 1825. 16°

A catalogue of the plants grown by Adanson's daughter at her estate, Baleine, in Allier.

AD 3 ADANSON, Aglaé *Catalogue des arbres, arbustes et plantes vivaces, cultivés ... à Baleine*
pp. 520–549. n.p., n.d. 12°

A reprint, probably from a horticultural journal, of a later edition of AD 2.

AD 4 ADANSON, M[ichel] (1727–1806) *Histoire naturelle du Sénégal. Coquillages. Avec la relation d'un voyage fait en ce pays, pendant les années 1749, 50, 51, 52 & 53*
[viii], 190 [ii], xcvi, 275 pp., folded map, 18 pls., del. et sculpt. [by] Th. Reboul. Paris, C. J. B. Bauche, 1757.

Bound with this volume:

[Prospectus] *Histoire naturelle du Sénégal* [1755] 2 pp.

[Prospectus] *Histoire naturelle de Sénégal* [1756] 8 pp.

Annotations: on title page “Collationé 1757 Adanson” and a paraphrase on the motto by Adanson “1754”; in the text area are a few annotations and the correction of some words. Some annotated slips are inserted among the leaves, e.g., at p. 11 a counter plea against M. Faujas on volcanic origin of basalt and on p. 67 *hirondelles* [swallows] hibernating in Senegal.

AD 5 ADANSON, M[ichel] *Familles des plantes* 2 vols. [Bound copy]
Vol. 1: [iv], cccxxv, 189, [1] pp. 1 pl. Paris, Vincent, 1763 [1764]. 8°

Contents: “Préface istorike de la botanike; Table cronologike des auteurs de botanike; Résultats des expériences les plus modernes sur l’organisation, l’anatomie & les facultés des plantes; Tables raisonnée des matières; Errata.”

Vol. 2: [ii], 24, [4], 640 pp. Paris, Vincent, 1763. 8°

Contents: “Tableau des 58 familles des plantes; Familles des plantes; Table [plant names]; Table raisonnée des vertus et usages des plantes.”

No annotations. Another copy in the Muséum National d’Histoire Naturelle, Paris, bears the collationé number 66, is heavily annotated, and was used for the second edition (see AD 10).

AD 6 ADANSON, M[ichel] *Familles des plantes* 2 vols. [Unbound sheets, containing some earlier page proof sheets] 8°

The sheets of both volumes are heavily annotated, probably in preparation for a second edition, but were not used for the second edition published by Payer [AD 10]. Some earlier pages, proofs of earlier stages, have been transferred here from the subject headings under which they were filed by Adanson.

AD 7 ADANSON, M[ichel] *Deux cours d’histoire naturelle générale et particulière sur les trois règnes*
1 p. Paris, Impr. J. Lamesle, 1772. Broadsheet

_____. *Cours de botanique et d’histoire naturelle, à la campagne*
1 p. Paris, Impr. J. Lamesle, 1773. Broadsheet

These are original posters for the series of lectures and field trips by Adanson. The 1772 copy is annotated with prices.

AD 8 ADANSON, M[ichel] *Plan & tableau de mes ouvrages*
Ex Observations et Mémoires sur la Physique sur l’Histoire Naturelle et sur les Arts et Métiers[de. Rozier].
18 pp. [Paris, Avril 1775]. 4°

Reprint, paged separately (originally paged 257–276), of a plan for a universal encyclopaedia projected by Adanson. Annotated by correction of two errors, plus (1) inside of cover, a dated

inscription of 1 Mai 1775 to The Royal Society, London in a different ink; and (2) a notation at top of first page that this is the only copy left with the Rapport of the Académie [AD 63] and that twice (1790 and 1795) copies sent to French government institutions were not returned. The manuscript of this report is AD 292.

AD 9 ADANSON, M[ichel] *Cours d'histoire naturelle fait en 1772 publiée sous les auspices de M. Adanson (Alexandre) son neveu avec une introduction et des notes par M. J. Payer*
2 vols.

Vol. 1: [vi], 580 [3] pp. Paris, Fortin, Masson et Cie, 1845. 12°

Vol. 2: [iv], 556 [2] pp. Paris, Fortin, Masson et Cie, 1845. 12°

AD 10 ADANSON, Michel *Familles naturelles des plantes ...* [2nd ed.]

Vol. 1: [iv], V, [2], 300 pp., 1 folded pl. Paris, Victor Masson, 1847 [1864]. 4°

Contents: Notice biographique [Alexandre Adanson]; Histoire de la botanique et plan des familles naturelles des plantes. All that was published.

AD 11 d'ALEMBERT (pseud.) [Jean LE ROND] (1717–1783) *Pensées de Monsieur d'Alembert* [ii], 2, 9–346 pp. Paris, Dufour, J. P. Costard fils & Co., 1784. 12°
d'Alembert [cf. note below on identity]

Annotated, partly critical; the title page: “No. 73 (Adanson),” and “Collationé 1784 Adanson.” The book contains among other material a short appraisal of Buffon (p. 287).

NOTE: d'Alembert, when an infant, was left on the steps of the church Jean Le Rond, and when christened was given the name Jean Le Rond. As he approached maturity, he abandoned this name and took for himself the single name *d'Alembert* by which he was known to his colleagues and in his writing [cf. Lemoine in *Dictionnaire de biographie française* 1: 1398–1495. 1933].

AD 12 AMMANN, Johann (1707–1741) *Stirpium rariorum in impero Rutheno sponte provenientium icones et descriptiones*

[viii], 210, [13] pp. [plates lacking]. Petropoli, Acad. Scient., 1739

[date of preface, July 18, Julian calendar]. 4°

Collationé Adanson No. 54. No annotations except on title page. Acquired by Adanson in Paris for 8 livres, in 1767 (cf. back of front cover, partly torn off).

Analyse de la Philosophie du Chancelier François Bacon ... cf. AD 45

AD 13 [ARDÈNE, Jean-Paul de Rome d'] *Abrégé des instructions sur le jardinage, qui font partie de l'année champêtre*

xii, 267 pp. Avignon et Marseille, J. Mossy, 1767. 12°

No Adanson number nor any trace of annotations by him. Name of former owner, Caroline Come, noted from impression of pencil writing. Possibly acquired by Adanson's daughter.

AD 14 ARDUINO, Pietro (1728–1805) *Animadversionum botanicarum specimen*
xxviii pp. Patavii, Conzatti, 1759. 4°
[Last date in vol. 3 Oct. 1759, p. xxviii.] [lacks the 12 plates].

No annotations except “No. 87 Collationé Adanson.” Plates (unfolded) were removed by Adanson and are filed in the plate collection [AD 128].

AD 15 [ARNAULT, Antoine-Vincent?] Adanson (Michel)
In, *Biographie nouvelle des contemporains* pp. 30–34, portr. [after bust, drawn by Tresel, intaglio by Desève]. [Paris, 1820.]

AD 16 ARTEDI, Petrus (1705–1735) *Ichthyologia sive opera omnia de Piscibus scilicet:*
Pars 1: 66, 2 pp.; pars 2: [iv], 118, [21] pp.; pars 5: [ii], 112, [2] pp.
Privilege [in Dutch] [3] p., dated “20 IV 1741.”
Lugduni Batavorum, C. Wishoff, 1738. 8°

Collationé Adanson No. 29. Annotations few: on p. 118 concerning numbers of species by the two other authors.

AD 17 BAILLON, H[enri-Ernest] (1827–1895) Adanson (Michel)
In, *Dictionnaire de botanique* vol. 1, p. 45. Paris, 1876.

A biographical account which shows the interest that the publisher, also the publisher of the journal *Adansonia*, had in Adanson.

AD 18 BATTARRA, J. [Giovanni] Antonio (1714–1789) *Fungorum agri Ariminensis historia*
vii, 80 pp. [lacks plates]. Faventia, Ballanti, 1755. 4°

No annotations except on title page “No. 57 Collationé Adanson.” and on inside of front cover: “acheté 3 [ivres] chez M. Bombarde in 1767 Collationé complet.”

AD 19 BERGEN, Carl August von (1704–1759) *Commentatio de thermometris mensurae constantis quondam seorsim publicata*
2nd ed. 48 pp., 1 pl. Norimbergae, Haeredes W. M. Endteri & J. A. Engelbrechti, 1757. 4°

Also in *Nova Acta Physico-Medica Acad. Leopold. Caes.* ... Appendix. Annotated.

AD 20 BOERHAAVE, Herman (1668–1738) *Aphorismi de cognoscendis et curandis morbis in usum doctrinae domesticae digesti*
9th ed. [viii] 304 [24] pp. Parisiis, G. Cavelier, 1745. 12°

The Approbation, dated “Junii xi anni 1744,” and the Privilege, dated “12 Junii 1744” are in *Libellus de materia medica*, also bound with this volume, together with a part of Boerhaave’s *Opera omnia, cum notis Alberti Haller & Commentariis Gerardi Van Swieten*.

Collationé Adanson. Above the ornament: “(1745 Adanson).” Inside cover: “Acheté 4 l[ivres] chez Cavelier 1748.” Heavily annotated, especially indices and blank pages.

BOERHAAVE, Herman *Libellus de materie medica et remediorum formulis quae serviunt aphorismis de cognoscendis et curandis morbis*
9th. ed. [vi], 228, [18] pp. Parisiis, G. Cavelier 1745. 12°

[Bound with *Aphorismi* 9th ed.]

On title page: “Adanson 1745.” Preface heavily annotated.

AD 21 BROHON, Joannes [Jean] (died ca.1575) *De stirpibus vel plantis ordine alphabetico digestis epitome, longe quam antehac, per Ioannem Brohon Constantinatem, locupletior, emendatiorque edita. Cui accesserunt volatilium, gressilium, placentarumque magis frequentium apud Gallias noia, per leodegarium a Quercu*
[47] pp. Cadomi [Caen], M. Angier [not Augier, as in Pritzel no. 2446], 1541. 8°

Alphabetical list, enlarged edition of Quercu, L. In *Ruellium de stirpium epitome* ... Paris, 1539; list of animals, etc. unchanged. Apparently connected with Ruelle, *De nature stirpium* (1536). Listed in Pritzel under Leger Duchesne, the French equivalent of Leodegarius a Quercu.

Collationé no. 82. No annotations.

AD 22 BUC’HOZ, [Pierre-Joseph] (1731–1807) *Dictionnaire raisonné universel des plantes, arbres et arbustes de la France* 4 vols.
Vol. 1: xii, 650 pp., Paris, J. P. Costard, 1770. 8°
Vol. 2: 651 pp., Paris, J. P. Costard, 1770. 8°
Vol. 3: 643 pp., Paris, J. P. Costard, 1770 [1771 according to Adanson]. 8° [From p. 529 *Flora Gallica*]
Vol. 4: 352, ccxlv pp., [*Flora Gallica* 1–334] Tables i–xciii, Paris, J. P. Costard, 1771. 8°

“Collationé Adanson.” Annotated, especially in the dictionary proper, in part 4 the index of diseases, on p. lxii the Méthode de Linn., p. clxxi, and the last pages.

AD 23 BUC’HOZ, [Pierre-Joseph] *Prospectus Nouveau traité physique et économique ... de toutes les plantes ...* Seconde édition.
6 pp. [preserved], Paris, “chez l’auteur.” 1787. 8° [?]

Ample description of the proposed series of “dissertations” accompanied with colored plates, of which the first volume “paroît actuellement,” containing 20 dissertations and 32 plates, specifying the plants treated. The price is to be 66 livres for the dissertations separately, or 60 livres for the complete first volume. Concluded with a list of books by the author available at his address or just in reprint. The list is incomplete because Adanson removed last leaf. Annotated only with abstracts. Originally filed in *Dictionnaire de botanique* under Végétaux.

AD 24 BUC'HOZ, [Pierre-Joseph] *Dissertation deuxième, en forme de compte rendu, à l'Institut National, spécialement à la classe des Sciences et Arts, et à la section de l'Economie Rurale et Végétale, des travaux économiques et vétérinaires de P. J. Buc'hoz*
8 pp. Paris, Impr. de Chabon, Thermidor An IX [Aug. 1801]. F°

A list of his publications, indicating the field, the recognition or lack of recognition he received, and plainly showing his quest for recognition. No annotations.

AD 25 BURMAN, Nicolaas Laurens (1733–1793) *Specimen botanicum de geraniis*
[iv], 52, [2] pp. [Plates lacking] Lugdun. Batavorum, T. Kaak, 1759. 4°

Collationé Adanson No. 59. Bound with it is Schmidel, D. D., *De medulla radices ad florem pertingent* [cf. Schmidel entry]. Some annotations.

AD 26 *Catalogue des arbres et arbrisseaux qui se peuvent élever en pleine terre aux environs de Paris*
[ii], 70 pp. Paris, J. Bullot, 1735. 12°

Collationé Adanson No. 78. Not annotated.

AD 27 *Catalogue des arbres à fruits, les plus excellens, les plus rares et les plus estimés qui se cultivent dans les Pépinières des Révérends Peres Chartreux de Paris*
79 pp. Paris, P. D. Pierres, 1785 [Approbation dated 1775]. 12°

No annotations except subject heading. A 5th ed. Other editions titled *Catalogue des plus excellens fruits* ... Cf. also Rehder, *The Bradley Bibliography* 3: 84. 1915.

Catalogue des plantes du Jardin de Mrs. les Apoticaire de Paris ... [cf. AD 47]

AD 28 CAVANILLES, Abbé Antonio José (1745–1804) *Dissertatio botanica de Sida, et de quibusdam plantis quae cum illa affinitatem habent*
[ii], 44 pp., 13 pls. Paris, F. A. Didot, 1785. 4°

Annotated. On title page: “Adanson 1785 Adanson” (at base of vignette); “doné le 10 janvier 1786 par Cavanilles abbé.” Critical remarks on Linnaeus noted (p. 24) and on Cavanilles (p. 29). Added information on the native locality of some plants described by Cavanilles, e.g., *Sida biflora* (“Cap Manuel et Ins. Goré, ex herbario Adasoni”) and *S. frutescens* [sic] (Senegal). Plates heavily annotated with names and details preparatory to cutting and filing in Adanson’s collection of figures [AD 128]. However, that collection includes the same plates from another copy. Académie approbation signed by Adanson and Antoine-Laurent de Jussieu and dated 13 avril 1785 is on p. 43–44. Probably the report for this approbation was prepared by A.-L. de Jussieu, for Cavanilles studied many plants from the de Jussieu herbarium; no draft of it exists in this collection.

AD 29 CAVANILLES, Abbé Antonio José [*Secunda dissertatio botanica. De Malva, Lavatera, Alcea, Althaea et Malachra*]

23 pls. [Paris, F. A. Didot, 1786]. 4° [Plates only]

No annotations present except Cavanilles' name and the figure numbers on the first plate. Two letters of, or on behalf of, Cavanilles were in this work and are now removed [cf. AD 177, 178]. Plate numbers were added on most of the plates (not in Adanson's hand), showing them to be proofs.

The last plate is pencilled, and later inked, xxxvi. In the printed book this plate has an engraved mark A. The paper of these plates, except for p. 35, is larger, whiter, and thicker than of the printed work, but which has the same bluish paper as pl. 35. The second letter [AD 178] suggests that this plate was sent to Adanson after the others, indicating it to be of the printed work. The Approbation was given by the Académie on 1 March 1786, but Adanson was not then a *commissaire*. Cavanilles' letter suggests that Adanson never answered it nor invited Cavanilles to see his herbarium, hence Cavanilles never sent the rest of the book to Adanson.

AD 30 CAYLUS, [Anne-Claude-Philippe de Tubiere de Grimoard de Levi] Comte de (1692–1765) *Dissertation sur le Papyrus*
56 pp. [Paris], 1758. 4° [Lacks plates]

Collationé Adanson No. 88. No annotations.

AD 31 CHABREY, Dominique (ca.1610—ca.1666) *Omnium stirpium sciagraphia et icones, quibus plantarum et radicum tum in hortis cultarum ...*
[2nd ed.] [x], 661, [28] pp. 3,463 Figs. in text. Genève, S. de Tournes, 1678. F°

Collationé Adanson No. 41. Annotated: "Acheté 5 l[ivres] 27 Juillet 1765."

AD 32 CHAULNES, [Marie-Joseph d'Albert d'Ailly] Duc de *Mémoire et expériences sur l'air fixe qui se dégage de la bière en fermentation. Addition*
42 pp. [Paris, ca.1781]. 4°

"Lu à l'Académie le 13 Décembre 1775." Apparently a reprint from *Mémoires de l'Académie des Sciences*, with separate pagination and signatures. A few annotations are present.

AD 33 CHEVALIER, Aug[uste] (1873–1956) *Michel Adanson, voyageur, naturaliste et philosophe*
172 pp., 5 pls. (incl. two portraits). Paris, Larose Editeurs, 1934. 8°

AD 34 *Choix des Mémoires et abrégé de l'histoire de l'Académie de Berlin*
Vol. 1: [ii], 439, [3] pp. Berlin, Haude, 1761. 12°
Vol. 2: [i], 423, [2] pp. Berlin, Haude, 1761. 12°
Vol. 3: [i], 418, [2] pp. Berlin, Haude, 1761. 12°
Vol. 4: [i], 492, [3] pp. Berlin, Haude, 1761. 12°

Annotated, mostly with abstracts. Vol. 1 marked: "Collationé 1762 Adanson."

AD 35 COMMELIN, Caspar (1668–1731) *Praeludio botanica plantarum rariorum & exoticarum in praeludiis botanicis recensitarum icones et descriptiones* [viii], 85, [1] pp. Lugdunum Batavorum, J. du Vivie, 1715. 4° [Lacks plates]

No annotations except the remark inside the front cover: “Acheté à Genève 7 l[ivres]” [in 1779].

Considérations sur les Moeurs ... [cf. AD 51].

AD 36 *Continuation des choses les plus remarquables arrivées par route l'Europe & autres parties du monde, depuis le mois de Septembre de l'Année 1783, jusqu'audit mois de l'Année 1784* Liège, n.d.

Of this work, only the following five leaves are present:

Regle Du Jardinage sur chaque mois de l'année

[4] leaves cropped, including the title page, part of gathering E, second leaf with signature E ij. 16°?

Moyen pour conserver les fruits

[Unnumbered and unsigned cropped leaf, 2 p.].

Not annotated except for subjects (“jardinage, succession” and “fruits”). Originally filed in *Dictionnaire de botanique* [AD 333].

AD 37 [CORTI, Bonaventura] (1729–1813) [Review] ... *découverte singulière sur la circulation de la sève dans les plantes* Ex Gazette de Littérature, des Sciences et des Arts No. 64 p. [1]–2, [Paris], Samedi 20 Aoust 1774. 8°? [Clipping]

Not annotated except for the subject heading. Originally filed with Corti's first letter [AD 183]. Protoplasmic movement clearly described as “sap movement.”

AD 38 CORTI, Bonaventura *Osservazioni microscopiche sulla Tremella e sulla circolazione del fluido in una piante acquaajuola* 207, [1] pp. 3 pls. [folded] Lucca, G. Rocchi, 1774. 8°
Annotated on plates only. Discussed in Adanson's reply to Corti's second letter [AD 184].

AD 39 CORTI, Bonaventura *Lettere sulla circolazione del fluide scoperta in varie piante* 48 pp. 1 folded plate including 5 figures. Modena, Società Tipografica, 1775. 12°

No annotations except subject notation on cover. Cf. Corti's letters [AD 183, 184] and Adanson's replies.

AD 40 [COSSIGNY, _____] *Lettre sur les arbres à épiceries, avec une instruction sur leur culture & leur préparation: et lettre sur le café*

[ii], 71, [1] pp. Paris, no publisher, [1775]. 12°

Content: (1) Letter to a “Colon de l’Isle de France, par un autre Colon ...” pp. 1–24. (2) Abstracts from works of Valentin (Michael Bernhard Valentini, 1657–1729) and Rumphius (Georg Eberhard Rumpf, 1628–1702) pp. 25–58; (3) “Lettre à Monsieur Fréron, ...” pp. 59–71. The author, who according to Adanson’s annotation is Monsieur Cossigny, discusses the introduction of spices, clove, nutmeg, and cinnamon in East-African islands by Poivre (cf. AD 343) and advocates a delay while awaiting fruiting; in the last part the introduction of coffee plants in Martinique and Guiana is discussed. The Approbation is dated 25 Jan. 1775.

AD 41 COVOLO, (Conte) Giovambatista dal *Discorso della irritabilita d’alcuni fiori nuovamente scoperta*
xxiv pp. Firenze, G. Albizzini, 1764. [Plates or plate missing.]

For accompanying autograph letter dated 12 Jan. 1765 cf. AD 185. Collationé Adanson No. 90. Annotated on title page only.

AD 42 CUBIÈRES, [Simon-Louis-Pierre?], l’ainé (1747–1821) *Mémoire sur le genévrier rouge, de Virginie, que l’on nomme vulgairement cèdre rouge*
11 pp. Versailles, J.-P. Jacob, 1805. [lu le 20 Prairial An 13, received by Adanson from Mr. Cardot 1 Oct. 1805.]

No annotations except date of receipt.

AD 43 D[AVID, Antoine] (1714–1787) *Lettre sur la vigne, écrite à Mr. L[e] B[aron] de la T[our] D[aupus]. par Mr. D[avid] le 16 de Septembre 1772*
32 pp. [Paris, 1772]. 8°

A *second letter* is dated 30 Mars 1775. [iv], 71 pp. [Paris, 1772]. 8°

No annotations except full names of author and addressee, partly illegible.

AD 44 DE LA CROIX, D[emetrius] [pseudonym for D. MacEncroe] *Connubia florum latino carmine demonstrata. Cum interpretatione Gallica D******
vii, 38 pp. Paris, Theobustea, 1728. 8°

A Latin poem with French interpretation. Collationé Adanson No. 92. No other annotations. Commemorates Vaillant’s discovery of sexuality in plants.

AD 45 [DELEYRE, Alexandre] *Analyse de la philosophie du Chancelier François Bacon avec sa vie* [2nd ed.] 2 vols. bound in 1.
[ii], 424, 428 pp., frontisp., Leyde, Librairés associes, 1778. 12°

Collationé 1785 Adanson. Annotated throughout, copiously so in the subject index on last page. “La vie du Chancelier François Bacon,” p. 1–245, is said to have been translated by Pouillot from the original English of David Mallet.

AD 46 DE LILLE, Abbé [Jacques Montanier] *Les jardins, ou l'art d'embellir les paysages; poëme*
135, [1] pp. Paris, Valade, Reims, Cazin, 1782 [Approbation and permis dated 15 Mai 1782]. 16°

“Collationé.” Annotated. For English translation see Hunt Cat. 702.

AD 47 [DESCEMET, Jean] (1732–1810) *Catalogue des plantes du Jardin de Mrs. les Apoticaire de Paris suivant leurs genres & les caractères des fleurs, conformément à la méthode de Monsieur Tournefort dans son édition Française de 1694*
102 pp. [Paris], 1741 [last date in volume is 8 VII 1741. Cover lacking, leaves loose]. 8°

“Collationé Adanson No. 77.” Annotated.

AD 48 D[ESHAYES, Gérard-Paul?] *Carte botanique de la méthode naturelle d'A. L. de Jussieu. Rédigée par le C[itoy]en D** d'après le tableau du règne végétal du C[itoy]en Ventenat membre de l'Institut National de France et l'un des conservateurs de la bibliothèque du Panthéon*

98 pp., plus a large table printed on four broadsheets of heavy paper [cut into strips by Adanson], Paris, Impr. de la République [Duboy-Laverne, see p. 4], An 9 (1801). 8° [except table]

Heavily annotated, in part sharply critical, e.g., the short citation reprinted by Chevalier (1934) is incomplete. The omitted portion reads, “Manoeuvre bien lâche et basse en emploient le nom de Durande célèbre très considéré par Jussieu et Lansel [?] rapporteur au ministre Luc. Bonaparte ...” [who was minister during the preparations of the work]. However, this insinuation is certainly in error as concerns Durande for the Dijon botanist Jean-François Durande died in 1794 and could not have known the printed *Tableau* of Ventenat. Probably Adanson was misled by the first sentence of the introduction: Since I have long been in possession of a copy of the “carte botanique” of Durande. This older “carte” [cf. Pritzel no. 2550 or *Catalogue* of the British Museum (Natural History)] is reported as *Méthode de Linné* and was published in 1781. The British Museum (N. H.) *Catalogue* ascribes (p. 412) a later edition of the 1801 “carte” to G. D. Deshayes and on p. 444 to Gérard Paul Deshayes (1795–1875). This is an error, as is seen when one compares year of birth with first date of publication. His works apparently are restricted to zoology, especially to malacology, starting about 1823. The 1801 “carte” is ascribed to G. P. Deshayes by Pritzel (no. 2498 in 1851 edition and no. 2181 in the 1872 edition), and also by J. Decaisne in the catalogue of the Jussieu library (op. cit. nos. 1038 and 1590). Possibly the author is the father of the malacologist.

This book was accompanied by a short letter signed Aristenète, 8 Messidor An 9 (27 June 1801) [AD 227], who was asked to forward this book to Adanson. This is recorded by Adanson on the title page as follows: “Recu le 27 juin 1801 (8 Messidor an 9) à 11. heur. du matin de la part d'Aristaenète (Felix Nogaret) qui étoit chargé de cette commission de ...”

AD 49 DUCHESNE, [Antoine-Nicolas] (1747–1827) *Essai sur l'histoire naturelle des courges*
46 pp. [Paris], 1786. 12°

Ex Lamarck's *Encyclopédie* [with]: Supplement of 18 Août 1786. Annotated.

AD 50 DUCHESNE, [Antoine-Nicolas] *Essai sur l'histoire naturelle des fraisiers*
46 pp. [Paris], 1786. 12°

Ex Lamarck's *Encyclopédie*. Annotated.

AD 51 DUCLOS, [Pierre-Charles] (1704–1772) *Considérations sur les moeurs de ce siècle*
5th ed. [vi], lv, 484, [vi] pp., frontisp. Paris, Praul & Durand, 1767

Annotated. This author, member of the Académie française, uses in this book some of the simplifications in French orthography advocated by Adanson in his *Familles des plantes*, though not necessarily knowing Adanson's proposals.

AD 52 DUHAMEL DU MONCEAU, [Henri-Louis] (1700–1782) *Traité de la garance et de sa culture* [2nd ed.]
vi, 131, [1] pp., 4 fold. pls., Paris, H. L. Guérin & L. F. Delatour, 1765.

Collationé Adanson No. 101. A monograph of madder (*Rubia*) and its culture, announced in a letter of Duhamel to Adanson [AD 192] and reviewed by him for the Académie.

AD 53 Du PETIT-THOUARS, [Louis-Marie] Aubert (1758–1831) *Histoire des végétaux recueillis sur les isles de France, la Réunion et Madagascar*
Première partie: xvi, 40 p., 10 pls. n.p. 1804. 4°

Annotation: “donne par l’auteur ce 15 avril 1804.”

AD 54 Du PETIT-THOUARS, [Louis-Marie] Aubert *Phytologie ou tableau général de la botanique*
176 pp., folding table, [no publisher], n.p. [probably Paris], [1811].

This book, lacking a title page, contains a “*Tableau synoptique de la phytologie*” and 120 pp. of explanations and discussions.

This *tableau* comprised a course of 20 *séances*, held in the Pépinière impériale du Roule from 20 June to 3 August 1811. Other papers in this volume are: *Plan d'une histoire générale des plantes, formée principalement de l'ouvrage de M. Adanson, intitulé Familles des plantes* (pp. 120–132), and *Notice historique sur les efforts que j'ai faits jusqu'à présent pour publier les matériaux que j'ai recueillis sur la botanique* (pp. 133–176). This copy is inscribed to M. [Alexandre] Adanson by Payer. The author unsuccessfully sought the place held by Adanson in the *Institut* after Adanson's death.

AD 55 ELLIS, John (1710?–1776) *Description du mangostan et du fruit à pain*
64 pp. 3 folded pls. Rouen, 1779. 8° [On last page]: “Approbation Adanson” dated “7 III 1778.”
4°

No annotations except names on plates.

AD 56 *Encyclopédie oeconomique*
16 volumes, Yverdon, 1770–1771. 8°

Annotated.

AD 57 FERRAND, _____ de *Mémoire raisonné sur l'avantage de semer du trèfle en prairies ambulantes*
viii, 58, [4] pp., Paris, Petil, 1769. 12°

Approbation “signé, Adanson.” The last date in the volume is 24 March 1769.

Few annotations: “de Ferrand, Chevalier de l’Ordre Royal & Militaire de S. Louis.”

AD 58 FILLASSIER, _____ *Tableau général des principaux objets qui composent la Pépinière dirigée par M. F. à Clamart, année 1781 et 1785*
8 pp. Paris, Clousier, [1784?] [Last date is 5 Nov. 1784]. 8°

Annotated on first page only, subject entries added for filing.

AD 59 FLAMEN D’ASSIGNY, M. *De l’agriculture considérée dans ses rapports avec l’économie politique d’où l’on déduit la nécessité d’établir des fermes expérimentales pour fonder l’art agricole*
38 pp. Paris, [no publisher], An 12 (Fructidor) Sept. 1804. 4°

Annotations “Reçu 12 7bre [Sep.] 1804.”

AD 60 FROIDEVAUX, H[enri] *Un projet de voyage du botaniste Adanson en Guyane, en 1763*
Ex *Bulletin de Géographie historique et descriptive* No. 2. 1893. 15 pp. Paris, E. Leroux, 1893.

Inscribed by the author to Monsieur [Napoléon] Doumet-Adanson (born 1834).

AD 61 GISEKE, Paul Dieterich (1745–1796) *Dissertatio inauguralis botanico-medica sistens systematica plantarum recentiora*
[vi], 54, [4] pp. Göttingen, F. A. Rosenbusch, 1767. 4° [Preface dated: 9 Oct. 1767; “grad. Doct. legitime obtinendo 3 Nov. 1767”].

Annotated, p. 30, 33, with contradictions to printed statements. (Cites Pallas, *Praef. elenchum zoophytorum* p. 54, 1767.)

AD 62 GMELIN, Johann Georg (1709–1755) *Flora Sibirica sive historia plantarum sibiriae*
Vol. 1: cxxx, 221, [26] pp. Petropoli, Acad. Sci., 1747. 4° [Last date in vol., 27 Apr. 1747.]
[Lacks plates.]

Collationé Adanson No. 55. Only annotation is on title page “2 vol. 30 livres.”

AD 63 [GRAND-JEAN] DE FOUCHY, [Jean-Paul] (1707–1788) et al. *Rapport fait le Mercredi 4 Mars 1775, à l'Académie Royale des Sciences, par Messieurs de Fouchy, LeRoy, Guettard & Desmarest, ... commissaires pour ... rendre compte des ouvrages manuscrits de M. Adanson de la même Académie* Ex *Journal de Physique, d'Hist. Naturelle & des Arts & Metiers* 4 pp. [Paris], [Mai] 1775. 4°

This separately paged reprint contains the report of the committee to the Académie on Adanson's plan for an encyclopedia [AD 8] with the recommendation that he publish separately the materials which are the result of his own research. The final draft apparently was written by Desmarest. No annotations, except at top: "C'est le seul Exemplaire qui me reste avec mon memoire (à garder) ici 2 pièces Adanson 1779"

AD 64 GREW, [Nehemiah] (1641–1712) *Anatomie des Plantes qui contient une description ... Traduit de l'Anglois* [par Le Vasseur] [xii], 215, [13] pp. (pp. 17–18 duplicated). 14 Figs. Paris, L. Rouland, 1675. 12°

Last date is 16 Nov. 1675; "achevé d'imprimer"; date of registration "17 Févr. 1665." No annotations. Stamped "E·D".

AD 65 GRONOVIVS, Jan Frederik (1611–1671) *Flora orientalis, sive recensio plantarum, quas botanicorum coryphaeus Leonhardus Rauwolffus, medicus augustanus, Amis 1573, 1574, et 1575 in Syria, Arabia, Mesopotamia, Babylonia, Assyria, Armenia, and Judaea crescentes observavit, et collegit...* [xxiv], 151 pp. Lugdunum Batavorum, E. de Groot, 1755. 8°

Collationé Adanson No. 72. Not annotated.

AD 66 HAUY [Abbé René-Just] (1743–1822) *Extrait d'un mémoire sur la structure des cristaux de grenat ... Extrait d'un mémoire sur la structure des spaths calcaires ...* Ex *Journal de Physique* ... Mai 1782, [or] Juillet 1782, 11 pp., 2 pls. [Paris, 1782].

Annotated with abstracts.

AD 67 [HELVETIUS, Claude-Adrien] (1715–1771) *De l'esprit* [2nd ed.] [xx], 481, [2] pp. Paris, Durand, 1769. 8°

Annotated, for the most part with abstracts. Collationé Adanson 1782. The first edition, published 1758, aroused the anger of the clergy and was publicly burned in February 1759.

AD 68 HERVY, Michel-Christophe *Catalogue méthodique et classique de tous les arbres, arbustes fruitiers et des vignes formant la collection de l'école impériale établie près le Luxembourg* [iv], 63 pp. Paris, Impr. Imper., 1809 [last date in volume is 13 Mai 1809]. 4°

No annotations.

AD 69 *Histoire des plantes de l'Europe et des plus usitées ... suivant l'ordre du Pinax de Gaspard Bauhin*

Vol. 1: xxxvi, 442 pp. Lyon, Frères Duplain, 1762. 8°

Vol. 2: 424 + 78 pp. Lyon, Frères Duplain, 1762. 8°

No annotations. Perhaps owned by another member of the family. Referred to as “le petit Bauhin.” Often ascribed to the publisher of its first edition— J. B. de Ville.

AD 70 HOFFMANN, Georg Franz (1761–1826) *Historica Salicum iconibus illustrata*

Vol. 1: [ii, separate title page] Lipsia, S. L. Crusius, 1785. F° [Probably printed on sheet with t.p. of fasc. 4].

Fasciculus 1; 32 pp. Tab. 1–5. 1785.

Fasciculus 2; 16 pp. Tab. 6–10. 1785.

Fasciculus 3; 18 pp. Tab. 11–16. 1785.

Fasciculus 4; [ii, title page], 12 pp. Tab. 17–24. 1787.

Vol. 2, Fasciculus 1; 12 pp. Tab. 25–31. Lipsia, S. L. Crusius, 1791. F°

No annotations by Adanson.

AD 71 KAEMPFER, Engelbert (1651–1716) *Amoenitatem exoticarum ...*

[viii], 912, [16] pp., [90 pls., many folded]. Lemgovia, H. W. Meyerus, 1712. 4°

Collationé Adanson 1775. Annotated, especially plates of plants.

AD 72 LABERGERIE, Jean-Baptiste Rougier [Baron de] (1759–1836) *Mémoire sur la culture, le commerce et l'emploi des chanvres et lins de France pour la marine et les arts*

[ii], 33 pp. [Paris], [1800] “Lu à l’Institut national le 21 nivose an 8.” 4°

Unopened, no annotations except date and subject heading on title page.

AD 73 LA BILLARDIÈRE, Jacques-Julien [de] (1755–1834) *Icones plantarum Syriae rariorum, descriptionibus et observationibus illustratae*

Decas prima. 22 pp. Paris, [the author], 1791. 4°

Decas secunda. 18 pp. Paris, [the author], 1791. 4° [lacks plates]

Two copies, annotated differently. Second copy, “Doné par l’auteur le 26 août Mardi 1800 Adanson.”

AD 74 LA LANDE, [Joseph-Jerome] de (1732–1807) *Éloge de M. Commerson*

99 pp. [Paris, 1775]. 12°

Reprint or preprint from *Journal de physique, chimie, histoire naturelle, arts* 5: 89–120; 8: 357–362 [cf. Pritzel]. Annotated critically. Commerson is said to have attacked systematists; Adanson annotated many of the quoted statements of Commerson as “fou.”

AD 75 LE JOYAND, [Claude-François] *Notices sur la vie, les travaux, des découvertes, la maladie et la mort de Michel Adanson*,. ..
39 pp., Paris, A. Bertrand, 1806. 8°

Biographical account of Adanson. Also published in: *Magasin encyclopédique* 5: 392–414. 1806.

Lettre sur les arbres à épicerie ... cf. AD 40

AD 76 LETTSOM, John Coakley (1744–1815) *Le voyageur naturaliste, ou instructions sur les moyens de ramasser les objets d'histoire naturelle, & de les bien conserver. Traduit de l'anglois sur la seconde édition ... auquel on a joint l'art de calmer les flots de la mer, ...*

[ii], xxii, [2], 211, 42 pp. Amsterdam, [no publisher] 1775. 12°

Few annotations.

AD 77 LÉVESQUE, P[ierre]-C[harles] (1736–1812) *L'homme moral, ou l'homme considéré tant dans l'état de pure nature, que dans la société*

[vi], 279 pp. Amsterdam, 1775. 8°

Annotated. Subject index added.

AD 78 LIÈGE, Jacques-César(?) *Expositio et dissertatio publicae de speciebus quae theriacam senioris andromachi, et theriacam coelestem ingrediuntur*

15 pp. Paris, Impr. J. H. Butard, 1758 ["Permis d'imprimer" dated 7 Oct. 1758]. 4°

"No. 134 (1)" is on the title page. No annotations except this number and subject heading.

AD 79 LINNAEUS, Carl (1707–1778) *Fauna suecica*

[xxix], 411 pp. [Title plate present, two other plates lacking].

Stockholm, L. Salvius, 1746. 8°

Collationé Adanson No. 18. Annotated.

AD 80 LINNAEUS, Carl *Flora zeylanica*

240, [20] pp. Holmiae, L. Salvius, 1747. 8°

Bound with it: Dassaw, C. M. *Nova genera plantarum zeylanicarum*.

Diss. acad. sub praesidio Linn. 15 pp. 1747.

Collationé Adanson No. 70. Annotated.

AD 81 LINNAEUS, Carl *Genera plantarum* 2nd ed.

xxii, [2], 470 pp., 2 pls., [folded table]. Paris, M. A. David, 1743 [1744]. [Publ. 1744; date of Privilège, 31 Dec. 1743]. 8°

Collationé Adanson No. 67. Copiously annotated. [For 2nd copy cf. also AD 82]

AD 82 LINNAEUS, Carl *Genera plantarum* 2nd ed.
xxii, [2], 470 pp., 2 pls., [fold. table]. Paris, M. A. David, 1743. [Publ. 1744; date of Privilège, 31 Dec. 1743]. 8°

Stamped “E·D,” no annotations. The two following Linnaean titles are bound with it:

Systema naturae 4th ed.
[ii], 108 pp. [fold. table facing p. 23]. Paris, M. A. David, 1744. 8° [For another copy see AD 86].

Fundamenta botanica
xxvi, [1] pp. [Paris, M. A. David], 1744 [Last date in vol. is 25 Oct. 1744]. 8° [2 pp. glossary mss. at end in unknown hand.]

AD 83 LINNAEUS, Carl *Materia medica, liber I. de plantis*
[xxxii], 252 pp., frontisp. Amstelaedamum, J. Wetstenium, 1749. 8° [Lacks the folding table.]

Annotated. Collationé Adanson No. 71.

AD 84 LINNAEUS, Carl *Philosophia botanica*
[vi], 362 pp., portr. 11 tab. Stockholmiae, G. Kiesewetter, 1751. 8°

Annotated. Collationé Adanson No. 69.

AD 85 LINNAEUS, Carl *Species plantarum* [2 vols. in 1.]
Vol. 1: [xii], 560 pp. Holmiae, L. Salvius, 1753; vol. 2: [ii], 561–1200, [32] pp. Holmiae, L. Salvius, 1753. 8° [Publication date of 1 May arbitrarily fixed for both volumes.]

Collationé Adanson No. 68, 1754. Abundantly annotated by Adanson, especially the index. Inscribed by Linnaeus to B. de Jussieu on the title page.

AD 86 LINNAEUS, Carl *Systema naturae* 4th ed.
[ii], 108 pp. [fold. table facing p. 23] Paris, M. A. David, 1744. 8°

Collationé Adanson No. 11. Annotated. [For another copy cf. AD 82]. Includes also his *Fundamenta botanica* (1744); for description cf. AD 82.

AD 87 LINNAEUS, Carl *Systema naturae* 7th ed.
viii, 224, 30 pp., 8 tab., portr. Lipsiae, G. Kiesewetter, 1748. 8°

Collationé Adanson 1748 No. 12; this number later was changed by him to “11 (1).” Adanson’s notation date is apparently a repetition of that on the title page; the portrait imprint is dated 1749. Adanson received this copy in Senegal in 1750 (fide Collection Requier ltrs. No. 33, Bibl. Avignon). Copiously annotated, many generic names added, plus an *Index gallicus* (a list of French names).

AD 88 LINNAEUS, Carl
Systema naturae 12th ed. 2 vols.
Vol. 1: 1327, [35] pp. Holmiae, L. Salvius, 1766; vol. 2: 736, [16] pp. Holmiae, L. Salvius, 1767.
8°

Mantissa plantarum
152, [12] pp. Holmiae, L. Salvius, 1767. 8° [Bound with vol. 2 of *Systema*].

Annotated, some pages copiously so.

AD 89 [LINNAEUS, Carl] [*Prospectus*] *Traduction complète des ouvrages de Charles Linné augmentées de notes critiques, & de la description d'un grand nombre d'especes & de genres nouveaux qui ne se trouvent point dans Linné*
6 pp. [2 pp. removed by Adanson, apparently of unrelated material]. Paris, Guillot, 1787. 4°

Annotated with sarcastic comments. Contains an advertisement of the French edition of Philip Miller *Dictionnaire des jardiniers* noting that vol. 7 will appear next June, vol. 8 (the last) in July a month later “without delay.”

AD 90 [LINNAEUS, Carl] Invitations for commemoration of Charles Linnaeus]

Four printed invitations. [26 Juillet, 30 Juillet, 4 Août, 22 Août 1790, their dates of receipt by Adanson.] Signed by “Association des Naturalistes de Paris. André Thouin et A. L. Millin, Secrétaires.”

Annotated sarcastically, and with: “non répondue.” Includes the invitation to the dedication of a new Linnaeus bust, which was soon destroyed during the French Revolution when mistaken for one of Charles IX.

AD 91 MALLET, M. *Mémoire sur le Quinquina de la Martinique, connu sous le nom de Quinquina-Piton*
14 pp. [Paris, 1779]. 4°

A few annotations are on first page. “Lu dans la séance publique de la Faculté de Médecine de Paris tenue le 9 Xbre 1779.” Probably a repaged reprint from a periodical of this “Faculté.”

AD 92 MARSILI, Giovanni *Fungi carrariensis historia*
xl pp. Patavio, J. B. Penade, 1766. [Last date: 18 Sept. 1766.] 4°

Collationé Adanson No. 89. Annotations few. Inscribed to Adanson by Marsili.

AD 93 MARTIN, _____ *Lettre à l'auteur des mémoires littéraires, etc.*
Ex Mémoires littéraires, critiques, philologiques, biographiques & bibliographiques, pour servir à l'histoire ancienne & moderne de la médecine, ... Art.
xxiv, pp. 225–226. Paris, 1776.

Treats the medical properties of a remedy utilizing a species of a “coralline” unknown to de Jussieu.

No annotations, except subject heading. Originally filed under the subject: Coralline, vermifuge, in *Dictionnaire de botanique*. Accompanied by clipping:

JACQUART, *Observation de M. Jacquart sur l' effet de la Coralline centre les vers*

Ex *La Nature considérée sous ses differens aspects ...* 1(7): 289–290, (15 Avril) 1779.

AD 94 MASSAC, M. de *Mémoire sur la qualité et sur l'emploi des engrais*

163 pp. Paris, Ganeau, 1767. 8°

Approbation [by] Adanson “25 I 1767. Registré 20 III 1767.”

Collationé Adanson No. 104, 1767. Presented to Adanson 15 May 1767 [cf. AD 217.]

AD 95 MEDICUS, Friedrich Casimir (1736–1808) *Index plantarum horti electoralis manhemiensis*

70 pp. 1 plate [folded] Manhemii, Typ. Academicis, 1771. 24°

Sent to Adanson by Thouin [cf. AD 243] on behalf of Medicus.

AD 96 MENTZEL, Christian (1622–1701) [*Pinax Botanonymos Polyglottos Kadolichos*, in Greek] *Index nominum plantarum universalis*

[xxxii], 331 pp. Berolini, Off. Rungiana, 1682. F° [Lacks plates].

Collationé Adanson No. 43, 1754. Annotated.

AD 97 MICHELIN, _____ et JAMIN, Ferdinand *Visite à ... Baleine commune de Villeneuve-sur-Allier, appartenant à M. Doumet*

8 pp. Paris, Impr. de l'Etoile, [1881].

Ex *Journal de la Société nationale d'horticulture de France*, numéro d'Août 1881, pp. 519–527.

AD 98 MOUTON-FONTENILLE [de la Clotte, Marie-Jacques-Philippe] (1769–1837) *Tableau des systèmes de botanique généraux et particuliers; ...*

[iv], 212 pp. 100 tables (2 fold.) [not paged], 95, 55 pp.

Lyon, L'Auteur, Reymann et C., F. Leclerc et C^e, V^e Brette, An VI [1798]. 8°

Unopened and uncut. Critical of Adanson, cf. pp. 51, 52.

AD 99 MUNTING, Abraham (1626–1683) *Phytographia curiosa, exhibens arborum, fruticum, herbarum et florum icones, ...*

[xxviii], 48 pp., 245 pls. Amsterdam, R. et S. Wettstenios, 1713. F°

Collationé 1785 (this indication later obliterated by Adanson). A few plates annotated with Adanson's generic names.

AD 100 NECKER, Noel Joseph de (1729–1793) *Methodus muscorum per classes, ordines, genera ac species cum synonymis, nominibus trivialibus, locis natalibus, observationibus digestorum, aeneisque figuris illustratorum*
xvii, 296 pp., 1 pl. Mannheimii, “Typograph. Academ. Elect. Scient.” 1771.

“No. 1,027 Collationé Adanson.” Some annotations on pp. 237, 241, 242, 254, and the plate. Cf. also Necker letters [AD 223, 224].

AD 101 PARKINSON, John (1567–1650) [*Theatrum botanicum*] *Index nominum huius operis latinis*
Pp. 1689–1720 only. [London, 1640].

Annotation: “J’ai extrait tout ce catalogue dans mon grand dictionnaire universel d’hist[oire] nat[urelle].” The copy was cut up for Adanson’s plate collection [AD 128].

AD 102 [PELLETIER DE FRÉPILLON, _____] *Essais sur la taille des arbres fruitiers*
60 pp., 5 pls. [Paris], L. F. Delatour, [1773].

The title page identifies this as being written by “une Société d’Amateurs”; Adanson notes on same page, “Par M. Pelletier de Frépillon, ecurier, fourier de la Maison du Roi, a Frépillon vallée de Montmorenci par Poilly.” Annotated, especially on the plates.

AD 103 PLINIUS, Caius Secundus *Historiae mundi libri XXXVII*
[xxxvi], [155], 173 pp. Genève, Iacobus Crispinus, 1631.

“No. 2 Collationé Adanson.” An inscription on the title page in another ink reads: “Doné au prix de Poésie greke et Latine sur ’Omère entier, Théocrite et Pindare, et sur Virgile et Horace, aux colleges S^{te} Barb. et Duplessis-Sorbon, ainsi que mon Aristote en 2 volumes fol. Adanson 1739.” This year date is not clear and could be read as 1737. However, an annotation at the end of the text of the book, on p. 273, reads clearly: “Adanson 1739.” An older inscription on the title page is: “Collegii Parisiensis Soc. Jesu.” The binding is stamped with the coat of arms of Louis XIII. The text is annotated by Adanson throughout.

AD 104 PLUKENET, Leonard (1642–1706) *Phytographia. Opera omnia botanica ...*
6 vols.

Vol. 1: Pars prior [8] pp., pls. 1–72. London, 1691. F°

Pars altera [4] pp., pls. 73–120. London, 1691. F°

Pars tertia [6] [4] pp., pls. 121–250. London, 1692. F°

Vol. 2: Pars quarta [2] pp., pls. 251–328. London, 1696. F°

Vol. 3: *Almagesti botanici icones* [iv], 28, pls. 351–454. [London], n.d. F°

Vol. 4: *Almagestum botanicum* [viii], 402 pp. London, 1696. F°

Vol. 5: *Almagesti botanici mantissa* [iv], 191, 29 pp. London, 1700. F°

Vol. 6: *Amaltheum botanicum* [iv], 214, 10 pp. London, 1705. F°

New title page of *Opera Omnia* 1720 added in each volume.

Many parts copiously annotated. “Collationé 1769 Adanson,” obliterated by him. “Exemplaire d’Anti d’Isnard de l’Académie des Sciences de Paris acquis et augmentée par moi (Adanson en 1754)” on title page of vol. 4. “Payé 380 l[ivres] à M. Gamel en 1769” on inside of front cover of most volumes; this date changed to 1754 in a few volumes. The plates are annotated by two hands: one, apparently Adanson’s, preparatory to cutting for his collection [cf. AD 128]; the second is uniform and large, adding numbers and descriptive phrases to unnamed figures, etc. Unless this is the addition mentioned above by Adanson, it could be the hand of Isnard.

AD 105 *Portrait du Solitaire des Ardennes précédé d’un entretien avec ses fleurs et d’un détail de sa vie champêtre*

43 pp. Aux Ardennes, 1789. 8°

[Printed for relief of a famine in the Ardennes. A journal *Bouillon* “15 VII 1789” is mentioned.]

Annotated. “Paié 3 livres 5 août 1789.”

AD 106 *Précis Pour Me. Poussardin; contre Durand [Signed] Dorlhac, Proc.*

6 pp. Paris, 1777.

Treats legal aspects of grain milling apparatus.

AD 107 PRIESTLEY, Joseph (1733–1804) *Manière d’impregner l’eau d’air fixe, et de lui communiquer les propriétés de l’Eau de Pyrmont, ... Ouvrage traduit de l’Anglois, par M. *** ... (Ex Journal d’observations sur la Physique, sur l’Histoire naturelle & sur les Arts et Métiers, par M. l’Abbé Rozier ...)* [probably vol. 2] 37 pp., 1 pl., 12° [Paris, 1773?]

Printed with it (pp. 39–51) is *Extrait de deux mémoires ...* by M. Venel [Gabriel-François] (1723–1775).

No annotations except subject heading at top of title page.

AD 108 QUER Y MARTINEZ, José (1695–1764) *Dissertation physique & botanique sur la maladie néphrétique et sur son véritable spécifique le raisin d’ours (Uvi Ursi)* Traduit de l’Espagnol.

60 pp. 1 plate. Strasbourg, J. G. Bauer, Paris, Durand, 1768. 8°

Collationé Adanson No. 92 (1). Annotations on plate only.

AD 109 *Réponse aux objections sur la culture de Melon, adressée à. M***. Ex Annonces, affiches et avis divers de Picardie, Artois, Soissonnois et Pays-Bas François* No. 26, Samedi 29 Juin 1771. Pp. 101–104. 4 pp. Amiens, Godart, 1771. 4° [The complete issue of this serial.]

Annotated. Originally filed under “Melon” in *Dictionnaire de Botanique* [AD 333].

AD 110 *Résultat Général Du Dépouillement Du Scrutin pour la liste indicative des candidats qui ont obtenu des suffrages pour la nomination d’un membre du Sénat conservateur, le 25 pluviôse an 8* [14 Feb. 1799]

4 pp. Paris, Impr. nationale, Pluviose An VIII [Feb. 1799].

The list of candidates nominated for the Senate. Adanson and A.-L. de Jussieu are included. Annotated.

AD 111 ROUELLE, [Hilaire-Marin] (1718–1779) *Expériences ... Analyse du petitlait préparé sans crème de tartre*

18 pp., [Paris], Vincent, 1773. 8°

Ex *Journal de Médecine, Chirurgie, Pharmacie &c.* Mars 1773.

Annotated with abstracts and with subject headings on title page. Treats more than the subtitle indicates.

AD 112 ROUELLE, [Hilaire-Marin] *Observations sur l'air fixe & sur ses effets dans certaines eaux minérales, &c.*

18 pp., [Paris], Vincent, 1773. 8°

Ex *Journal de Médecine, Chirurgie, Pharmacie &c.* Mai 1773.

Annotated with abstracts; subject heading on title page.

AD 113 ROUELLE, [Hilaire-Marin] *Observations sur les fécules ou parties vertes des plants, & sur la matière glutineuse ou végéto animale*

20 pp. [Paris], Vincent, 1773. 8°

Ex *Journal de Médecine, Chirurgie, Pharmacie &c.* par M. A. Roux [editor]. Juillet 1773.

One annotation is on last page.

AD 114 ROUELLE, [Hilaire-Marin] *Réponse ... aux observations de M. Desbois de Rochefort, sur l'analyse du lait, &c.*

15 pp., [Paris,] Vincent, 1773. 8°

Ex *Journal de Médecine, Chirurgie, Pharmacie, &c.* Décembre 1773.

Annotated with subject heading only.

AD 115 ROUELLE, [Hilaire-Marin] et D'ARCET [Jean] (1727–1801) *Expériences ... sur la quantité d'or qu'on retire de la terre végétale, entre autres, & des cendres des végétaux*

19 pp., [Paris, c. 1778]. 8°

Annotated with abstracts only. Probably a reprint.

AD 116 ROUSSELON, _____, *Notice biographique et nécrologique sur M^{me} Aglaé Adanson*

5 pp. [Paris, 1852].

Ex *Annales de la Société Nationale d'Horticulture de Paris*, pp. 366–370. [1852].

Mentions Michel Adanson's manuscripts.

AD 117 RUMFORD, comte de [Thompson, Benjamin] (1753–1814) *Mémoires sur la chaleur* lxxviii, 166 pp., Paris, Firmin Didot, An XIII–1804. 8°

Abundantly annotated. Leaves cut from binding and loose, rounded at the edges. “Reçu ... 12 7bre [Sept.] 1804....” Inscribed on half title to Adanson by the author.

AD 118 SCHABOL, Abbé Jean-Roger (1690–1768) *La pratique du jardinage. Ouvrage rédigé après sa mort sur ses Mémoires par M. D[e]*** [La Villehervé]*

Vol. 1: [ii], xxvi, 384 pp. Paris, Debure, 1770. 8°

[Last date in volume is 30 Janv. 1770 (p. xxiii)]; [with a biography of Schabol]

Vol. 2: [ii], 308 pp. Pls. i–xviii (last plate folded) Paris, Debure, 1770. 8°

Annotated, mostly with abstracts.

AD 25 SCHMIDEL, Casimir Christoph (1718–1792) *De medulla radice ad floram pertingente sisserit*

[10] pp., [lacks plate] Lugdun. Batav., 1759. 8°

Bound with Burman, N. L., *Specimen botanicum de Geraniis*.

AD 119 SERRES, Olivier de (1539?–1619) *Le théâtre d’agriculture et mesnages des champs. Nouvelle édition, augmentées des notes et d’un vocabulaire, publiée par la Société d’Agriculture du Département de la Seine* 2 vols.

Vol. 1: cxcii, 672 pp. Paris, Huzard, 1804 (An 12). 4°

Vol. 2: xlv, 948 pp. Paris, Huzard, 1805 (An 14). 4°

[Includes portrait and memorial of O. de Serres]

No annotations. Binding of this copy stamped as dedicated to Aglaé Adanson by the “Société Royale et Centrale d’Agriculture” and dated “25 avril 1824.”

AD 120 SINCLAIR, John (1754–1835) *Projet d’un plan pour établir des fermes expérimentales* 16 pp. 3 folded pls. Paris, [1800]. 4°

French translation, followed by: *Raport de Tessier et Cels*. 16 pp.

Paris, 1800. “Lu à la classe des sciences physiques et mathématiques [20 Juill. 1800].”

Annotated. “Recu à l’institut le 18 8bre 1800.” Possibly reprinted or preprinted from a serial of the Institut.

AD 121 SONNERAT, [Pierre] (1749–1814) *Voyage aux Indes orientales et à la Chine, fait par ordre du Roi, depuis 1774 jusqu’en 1781: ...* 2 vols.

Vol. 1: xv, [8], 317, [1] pp., 80 pls., Paris, l’auteur, Froulé, Nyon, Barrois le Jeune, 1782. 4°

Vol. 2: viii, 298 pp., pls. 81–85, Paris, l’auteur, Froullé, Nyon, Barrois le Jeune, 1782. 4°

Annotated. “Collationé 1785 Adanson.” The missing zoological and botanical plate nos. 86–140 were filed by Adanson in his plate collection [for botanical plates cf. AD 128]. One plate checked (no. 133) is an untrimmed leaf, but Adanson’s bound copy shows no trace of plates cut

or removed. Stapf, in *Index Londinensis*, mentions plates in a separate Atlas, not cited by Pritzel for this edition (cf. Stapf *sub Ravenala madagascariensis*).

AD 122 SUE, Jean-Joseph (1760–1830) *Essai sur la physiognomonie des corps vivants, considérées depuis l'homme jusqu' à la plante* [iv], 295 pp. Paris, Chez l'auteur & Du Pont, An V–1797. 8°

Annotations. “Reçu à l'Académie le ... Juillet 1797” and the botanical parts heavily annotated.

AD 123 TESSIER, “Abbé” Henri-Alexandre (1740–1837) *Moyens éprouvés pour préserver les fromens de la Carie* 20 pp. Paris, 1786. 8° [Last date is “24 VII 1786”]

Treatment of grain against smut. No annotations except subject heading.

AD 124 TOURNEFORT, Joseph Pitton de (1656–1708) *Institutiones rei herbariae* 2nd ed. 3 vols.

Vol. 1: [xx], 697, [3] pp. Paris, Typographia Regis [J. Avisson], 1700. 4°

Bound with this vol. is his *Corollarium Institutionem Rei Herbariae ...* 58 pp. [Paris, 1703 fide Pritzel; last date in the work: 9 Dec. 1702].

Vol. 2: pls. 1–250. [n.p., n.d.] 4°

Vol. 3: pls. 251–489. [n.p., n.d.] 4° [The total number of plates is that of the 3rd ed. (476 in 2nd ed.) suggesting that vols. 2 and 3 are of the later ed.].

“No. 63 Collationé Adanson 1739.” Vol. 1 annotated, sect. VII [fruits] heavily so. Three annotated slips are loose in it. Bought by Adanson for 42 livres.

AD 125 VAILLANT, Sébastien (1669–1722) *Botanicon parisiense* [xviii], xii, [4], 205, [49] pp. Portr. [loose] Leiden-Amsterdam, Verbeek et Lakeman, 1727. F° [Lacks plates].

Collationé Adanson No. 52, 1754. Annotations critical of Bernard de Jussieu are on last page of preface.

AD 126 [WOLF, Nathanael Matthaeus von (1724–1784)] *De genera plantarum vocabulis characteristicis definita*

177 pp. [+ 1 p. Errata, printed on back of new p. 177, originally with Concordantia, Dantiscum, 1780, pasted on back of title page in this copy], [Danzig], 1776. 8°

Inscribed to “Addanson” signed “Dantzig 1780” on flyleaf (watermarked 1779). No annotations except name of author. Another copy in Hunt Botanical Library has only the new page 177, with errata as part of the Concordantia. The work represents an interesting effort to assign code words to plant genera whereby each letter in a certain place indicates a special property of the genus.

AD 127 WÜRTZ, Georg Christopher *Dissertatio inauguralis medico de Affinitatibus Virtutum Medicatarum. ...*

[iv], 36 pp., 1 engraved table [scheme] “G. C. W. inv. scrips. & exc.,” Argentorati, J. Lorenzii, 1777, 10 Sept. 4°

Annotated at motto only. Accompanied by an autograph letter of Würtz received 1783 [AD 245].

PLATE COLLECTION

AD 128 Plate collection.

A collection of more than 10,000 printed figures of plant species cut from more than 40 books and other publications. The original plates, when containing more than one species, were cut by Adanson and the figure of each was filed according to his classification. All plates and cut-up portions were arranged by him in paper folders according to his natural method of the *Familles des plantes* and grouped in 17 bundles. Each plate or figure is annotated by him with an Adansonian name and usually with the source of the figure.

HOLOGRAPH LETTERS

All letters were written to Adanson in French, unless indicated otherwise. The number of pages stated refer to the number of written pages; a leaf written on both sides is counted as two pages. The address, when on the back of a leaf, is not included in the page-count. All rectos and versos of the letters were scanned and are included in the PDFs. Letters are arranged alphabetically by the name of the originator. In many of these letters Adanson wrote (often interlineally) either a copy of his reply or a trial draft of same. In other instances the mss. consists only of a draft in his hand, identified below as “draft.”

The abstracts given below are selective and do not include all subjects treated nor all names of persons or places mentioned. None of the passages is to be considered a direct or free translation of the original letter. Spelling of dates cited are as in originals, as is that of all passages.

AD 129 ADANSON, Madame [Jeanne] [Paris?] 1 Novembre 1783. 1 p.
[To Charles Cretté, marchand d’arbres à Vitry.]

Annotated on back re the number of trees delivered at Neuilly and their prices, with receipt for total. Added by Adanson: “bon pour [the sum referred to].” Accompanied by a list of numbers and names of the cultivars delivered [cf. AD 132].

AD 130 [ADANSON, Michel], [Paris], 20 Mars 1768. 2 pp.
Draft of letter to Mgr. [Clément Charles François] de l’Averdy (1723–1793), ministre d’État.

Offers his services as censor of natural history and agriculture, and especially to revise papers for the *Gazette d’Agriculture et de Commerce*. Suggests the requirement of one “arpent” of land for each of the 300 races of wheat, with which he wants to experiment. The Compagnie des Indes is said to lack a responsible person knowing natural history, agriculture, and mining; Adanson suggests himself. No indication of a reply.

AD 131 ADANSON, Michel, [Paris?], 19 9bre [Nov.] 1777. 2 pp.
[To] M. [Bertrand] Bajon, ch[irur]g[ien] corresp. de l’acad. [for] M. Patris, à Caienne. [Draft.]

A list of names of plants, with plate numbers of Aublet, requested by Adanson from French Guiana.

AD 132 ADANSON, Michel, [Paris?], ... Août 1780. 4 pp.

Draft of a letter to de Condorcet with remarks and corrections on a printer's proof of the *Éloge* for Bernard de Jussieu, printed in *Mémoires de l'Académie des Sciences* 1777: 94–117, 1780. Adanson defends himself against the plagiarism hinted at, contends that his *méthode* is opposite to de Jussieu's and gives details of his connection with de Jussieu in this respect. He says, indirectly, that he himself gave the answer to Jean-Jacques Rousseau, ascribed to de Jussieu in the eulogy, when Rousseau asked on a field trip which method in botany should be followed. The answer was: "none, he should study the plants in the order in which Nature offers them to him" (l.c. p. III). Adanson cites the year and the place of the field trip. It is not certain that this letter was sent to de Condorcet, since the date is not filled in, and understandably Adanson was hesitant to accuse his friend Bernard de Jussieu. Later, on this same draft, he added the comment, "a imprimer avec les methodes de Botanique qui m'ont suivie." Certainly de Condorcet did not change his statement in the final printing of the *Éloge*. Although this draft is undated, Adanson noted in a postscript added to it that he was sending a copy of his *Histoire du Sénégal* to de Condorcet, which suggests the reply did go to de Condorcet.

AD 133 ADANSON, [Michel], Paris, 24 7bre [Sept.] 1784. 2 pp.
To Charles Cretté, marchd. d'arbres, Vitry.

Original small "billet" to repeat an order for 87 kinds of fruit trees, to be delivered at his new address rue de la Rochefoucault. Annotated to show actual numbers of plants delivered and their prices. 3rd page has a list of fruit trees and their prices, signed: "ce Lundi 1. 9bre. [Nov.]" Address side stamped with postmark. Accompanied with a list of a later shipment, 10 Novembre 1784, including 70 *pourettes* of white mulberry.

AD 134 [ADANSON, Michel], [Paris], 18 Juin 1767. 1 p.
Draft of letter to M[onsieur] Gerard [probably Louis, author of *Flora Gallo-provincialis*, 1761].

Adanson returns a "dissertation" of M. Turra (apparently *Farsetia, novum genus ... Venetiis* 1765), which he read without pleasure or profit, judging the author another "Arduin" in botany. His *Farsetia* is, according to Adanson, nothing else than a species of *Lunaria*, and he barely understands Adanson's *méthode*, when he thinks the corolla alone to be sufficient to distinguish *Farsetia* from *Lunaria*; it is Linnaeus' system and not Adanson's.

AD 135 ADANSON, [Michel], [Paris, n.d.]. 2 pp.

Draft of letter to Guettard, member of the Académie. Having read the memoir of *M. ... sur l'arction* [i.e. *Arctium*] of Dioscorides, M. Adanson notes that the author neglected to make some of the corrections, additions, and cancels indicated [by Adanson], and that his conclusion contradicts what Adanson had told him. Adanson returns the memoir to Guettard as unfit for presentation to the Académie, asking him to consider the objections raised and to accept the rejection he will request of the Académie as *rapporteur* of this paper.

Accompanied by two leaves (3 pp.) of Adanson's description of the genus and one species of [*Arctium*]. Originally filed in *Dictionnaire de botanique* under *Arction*.

AD 136 [ADANSON, Michel], [Paris, n.d.]. To Monsieur Le Sassier. 1 p.
Catalogue des objets d'histoire naturelle du Mississipi [*sic*] demandés à Monsieur Le Sassier.

Comprises a list of wanted items: 4 minerals, 11 animals, 3 of plant materials.

AD 137 ADANSON, [Michel], Paris, 17 Juin 1775. 3 pp.
To Mr. Robillart, Négociant, [Paris], "Pour mettre s'il lui pl[ait] à M. Le Grand."

An answer to a Prospectus for the *Bibliothèque de Médecine*, and for which Robillart apparently asked Adanson for biographical information. The poor treatment given by some authors of similar works to such requests caused Adanson to forget himself and to leave to posterity his distinctions between three types of scholars: (1) those who have the genius of invention and method, (2) those who have only the method, and (3) those who are only compilers. Nevertheless, Adanson sent a sketch of ideas of interest to him and of which truth will be the only merit, together with a sketch of his life and ideas, stressing his *méthode naturelle*.

AD 138 [ADANSON, Michel], Paris, 15 Mars 1769. [1 p.; incomplete, for the first part is missing] [Addressee unknown, perhaps Albert von Haller.]

Gives directions for reciprocal shipments of plants and seeds. Criticizes Linnaeus sharply for his bad Latin, noting that Linnaeus' generic names of *Scopola*, *Tillaea*, and *Jussiaea* should be *Scopolia*, *Tillia*, and *Jussia*, and that *Pittonia*, *Jacquina*, and *Adansonia* should be *Pittona*, *Jacquina*, and *Adansona*. Linnaeus did not lose his judgment, because Adanson could not find in his works the slightest trace of it. Adanson defies anybody to show him anything new [in Linnaeus' work] which warrants one hundredth of the celebrity which he acquired only by praising his pupils, although he cannot boast of having made one botanist, in contrast with Tournefort, who made the de Jussieu's, and other persons who will avenge this Age of usurpation.

Adanson reports that it is his intention to publish his "figures," so that all naturalists may obtain them at the lowest price possible, 80 livres per 1,000 plates for subscribers and 100 livres for others, making the cost 2,400 to 3,000 livres for a complete set of 30,000 natural history plates. These would be well executed, with details drawn by Adanson himself, which would eliminate the expense of 10- to 30-thousand livres otherwise necessary for purchase of illustrated natural history books, and which often are so incomplete that time spent in search of such figures is lost.

He notes that this second edition of *Familles des plantes* is completely ready for publication, with accounts of new genera and other additions; it will not go to the printer before the *Histoire du Sénégal* is published, which the publisher promises to take up without delay.

AD 139 d'ALEMBERT, [a *nom de plume* for Jean LEROND, cf. AD 11] (1717–1783), Paris, 16 Mars [1772]. 1 p.

Asks Adanson to do what he can to enable M^r. L'abbé Remy [also written Remi] to attend Adanson's "cours."

A draft of Adanson's reply notes that it is sufficient to be interested in behalf of someone if d'Alembert is; he will see what can be done, although the idea of easing the conditions of the *cours* had not occurred to him, for he has considerably expenses and hopes to be successful. Mentions also the recent death of his mother and ends with greetings from Madame Adanson.

AD 140 ANDRIOT, _____, Arcy Sainte-Restitute [a Fère en Tardenois], 22 F[évrier]r 17[64].

Was charmed to receive Adanson's letter. Reports on wheat growing methods in the region. Should prefer to rent the cheaper room with Mlle. Le Maux, provided M. Hautteclocq will release him from existing arrangement. Closes with a sentence in Ouolof [cf. p. 20].

Andriot, college friend of Adanson, was "officier du génie, chargé de l'entretien des forts de Saint-Louis et de Gorée" during Adanson's stay in Senegal.

In his reply of 4 Mars 1764, Adanson thanks Andriot for details on wheat growing and asks for more information and seed samples from Damartin or other cereal-growing region. Plans to go himself to Damartin, but fears the bad roads; cannot go later than 25 Mars, wanting to start then daily observations on his seedlings. Mentions a notary Deshaies, hanged by effigy because of bankruptcy, remarking he will not have lost his appetite by that. Reports that his negotiations for the post at Louvain has not been completed. Advises Andriot not to envy people going to [French] India, because of politics. Ends with an Ouolof sentence, possibly concerning Senegalese persons known by both men.

AD 141 AVED, [Charles-François, Maitre des Eaux et Forêts de Chaumont en Bassigny] (ca.1730–1787), Chaumont en Bassigny, 3 [Jan.] 1767. 2 pp.

Praised Adanson's *Familles des plantes* and Duhamel's *Elémens d'Agriculture* as precious and hoped that M. Bombarde, who died in March of the previous year, would have introduced him to Adanson. Wants to be informed on good books in natural history so as to avoid falling into traps of charlatans like Dagoty and Buc'hoz; criticises Buc'hoz's first book sharply, and to which he was misled by the use of Adanson's name in the prospectus. Could not get Adanson's *Voyage* at several booksellers in Paris. Would be happy if Adanson would come to herborize with him in the country; facilities are at his disposal.

AD 142 AVED, [Charles-François], Chaumont en Bassigny, 17 Février 1767. 3pp.

Gave Adanson's *Mémoire* [cf. AD 274] at once to the "Procureur du Roy," who knows Villeneuve au Roy and of Adanson's plan to buy property there for 6,500 livres. Inasmuch as Adanson talked to him about finding an intelligent widow to run his household, Aved recommends his unmarried sister-in-law, the daughter of the late Marquis de Magnac, who lost his money in chemical experiments.

Draft of reply on address side, dated “22 Févr. 1767,” discusses the possible purchase of the Villeneuve property and plans a visit to Villeneuve au Roy.

AD 143 AVED, [Charles-François], Chaumont en Bassigny, 26 Février 1767. 3pp.

Aved is willing to purchase the Villeneuve property for Adanson in his own name, to be reimbursed by Adanson later. Will introduce Adanson to his beautiful sister [-in-law] and seeks Adanson’s advice on how to improve Aved’s garden. Will show him a book of Wallerius *Essais chimiques d’agriculture*. Asks for 300 or 400 asparagus “pattes” and seed of Cardons.

No draft of reply. Adanson instead went to Chaumont [AD 366] on 3 March 1767 to see the Villeneuve property, returning on the 9th.

AD 144 AVED, [Charles-François], Chaumont en Bassigny, 9 Mars 1767.

Regrets inability to have crayfish for Adanson for dinner, but just after his departure, 200 crayfish were available. Aved’s wife reminds Adanson of his word to return in August to construct a building at Villeneuve.

A draft of Adanson’s reply dated “14 Mars 1767,” reports delivering the snipes to Aved’s mother and of embracing her on behalf of Aved and his spouse. Notes that Aved’s daughter did not permit him to do so; such was the situation in which a man finds himself when not too bold with the fairer sex. The coach gave him continuous inconvenience; the body broke in two and an iron strip and ropes used for repair made it as rough as a “charette,” causing him pains that still inconvenience him. In Paris Adanson prepared about 100 fruit trees, flower bulbs and some of the most rare plants of his garden for shipment to Chaumont; a list of the plants is given as well as instructions for handling and planting them. Four hundred asparagus plants were sent to Mlle. de Magnac with the comment that, this “amiable philosophe” will not have found Adanson very gallant.

AD 145 AVED, [Charles-François], Chaumont en Bassigny, 19 Mars 1767. 4 pp.

Acknowledges Adanson’s letter of 14 March. Reports that the owner of the Villeneuve property has not replied. In case the Villeneuve acquisition might not succeed, another property 1.5 miles away is discussed. Mentions the possibility of his living part of the year in Paris.

AD 146 AVED, [Charles-François], Chaumont en Bassigny, 28 Mars 1767. 4 pp.

Reports that he waited in vain for an answer from the owner of the Villeneuve property. Discusses other properties in the neighborhood. Makes plans for their living and gardening together either in Reclancourt, Harlicourt or elsewhere for the coming summer. All, from his wife to the cat, love Adanson but he needs solitude for himself to finish his great work.

AD 147 AVED, [Charles-François], Chaumont en Bassigny, [18 Avril] 1767. 3 pp.

Reports he will do all he can to have Adanson as a neighbor. Mentions plants Adanson sent to him; the Passion-flower remains dormant; tulips and hyacinths do not flower and their leaves begin to wither. The niece of a friend is in Paris for a few days and the small thermometer could be sent back by her. Aved asks in a postscript for two pomegranate trees with simple flowers and reports placing the fig trees *en pleine terre* and will try to carry them through the winter in accordance with Adanson's advice.

Adanson's draft in reply, dated 8 May 1767, discusses return of repaired thermometer and pomegranate trees with cultural instructions for many of Aved's plants. Says to abandon plans for the Villeneuve property, for he must live near Paris to attend to Académie affairs, and is buying the house where now living. Seeks land from the king for his wheat experiments [cf. AD 130] and Aved can help in locating same in his region. If these plans fail, he will acquire a small property not more than about 5 to 6 *lieues* from Paris, to enable him to go to and return from Paris the same day.

AD 148 AVED, [Charles-François], Chaumont en Bassigny, 12 May 1767. 3 pp.

Aved describes again an available property which he will finance for Adanson. Expresses his warm lifelong feeling of friendship. Aved will visit Adanson in Paris and promises to take him again to the "rentrée de l'Académie" in his carriage. Apparently this letter was sent before Adanson's reply to AD 147. See AD 149 for draft of reply.

AD 149 AVED, [Charles-François], Chaumont en Bassigny, 19 May 1767. 3 pp.

Reports that everyone was sorry to learn of Adanson's decision not to buy a residence in Villeneuve. A new scheme is proposed in great detail for residence for Adanson at almost no expense to him.

Draft of reply [to AD 148 and 149,] dated Paris 28 May 1767. Expresses his gratitude for sacrifices offered in his favour, and trusts that Aved will sense his embarrassment. Renounces his experiments with cereals; government aid is needed for the success of such a project which is completely beyond the capacity of a private individual, but will continue experiments on a small scale.

AD 150 AVED, [Charles-François], Chaumont en Bassigny, 4 Aout 1767. 3 pp.

Another property is described and suggested to Adanson. With this letter is an undated leaf of a letter of Aved to his mother, in Paris, describing some properties in Harlicourt to be provided to Adanson, which she apparently did, as Adanson's address is in a hand other than Aved's.

AD 151 AVED, [Charles-François], Chaumont en Bassigny, 26 Mars 1768. 3 pp.

Proposes to Adanson the free use of a property inherited from the Comte De Magnac at Chatronge [Chartronges is Chevalier's spelling (1934, p. 99)], fifteen *lieues* from Paris.

In undated draft of reply, Adanson cites impossibility to accept proposal, his health denying him any kind of a voyage; must fulfill obligations and attend meetings of the Académie. Must not live more than 5 *lieues* at most from Paris, so as to tend his garden daily and to eat there after the Académie meetings. If the proposal would have fulfilled these requirements, he would have accepted it, but never as an outright gift.

This letter originally was on top of the packet of this group, with the manuscripts of the Villeneuve property [cf. AD 274], of which the upper one gave its dimensions. These elements were misinterpreted by Chevalier (AD 33, p. 99), who stated that Adanson rented in “Chartronges” a farm with the dimensions of the Villeneuve property. Adanson never bought or rented any of the properties mentioned in these letters, but did seriously consider that at Villeneuve au Roy.

AD 152 AVED, [Charles-François], Chaumont en Bassigny, 27 Decembre 1783. 3 pp.

Reports availability of a property in Saint-Martin, a village near Villeneuve au Roy, for the price of 30,000 livres. Aved’s seafaring son has brought some seeds which Adanson may have if wanted. Discusses Camus’ medical applications of electricity believing the results are at best not permanent. Sends greetings to Adanson’s wife and the “charmante Aglaë.”

Adanson’s reply, drafted interlineally, regrets inability to accept Aved’s offers because his present home at Neuilly has been leased for nine years, and he cannot live more than 2 *lieues* from Paris because of his work. Discusses other points of Aved’s letter.

AD 153 AVED, [Charles-François], Chaumont en Bassigny, 21 Juillet 178[4].

Looked for Adanson each week since meeting him six weeks previous and left him a letter which probably was not received. Saw Adanson’s place on the other side of the river at Neuilly. Offers him a house for the summer; acceptance alone will be sufficient compensation. Discusses plans for his own future, saying that he was applying for a position to the *Contrôleur Général*, M. de Calonne [Charles-Alexandre (1734–1802)], who had already favored the family. Mentions possibility for educating Adanson’s daughter and the receipt of a stone from the Mississippi River said to cure nervous spasms, even epileptic ones.

Adanson’s reply is on separate leaf, dated Paris, 1 8bre [Oct.] 1784. Apologizes for the silence following receipt of Aved’s former letter [not in this collection]. Reports that he now has regained his former liberty, so necessary for his serious and philosophical works and can devote himself to a friendship as sincere as Aved’s is for him, the only fault being the great distance between Chaumont and Paris. Notes that if Aved should move to Paris, the state of their fortunes should not differ too much if their’s is to be a pure and philosophical friendship! Reports that the stone of the Mississippi River is a jade whose only virtue is in one’s imagination.

AD 154 AVED, [Charles-François], Chaumont [en Bassigny], 21 May 1786. 3 pp.

Reports on delay in mulberry growth. Invites Adanson to dinner when Aved will be in Paris and to spend the summer with him in the country until the opening of the Académie. Will write soon

to M. de Calonne to remind him that while Adanson would not solicit justice for himself, he cannot prevent his friends from doing so. Will soon return Adanson's book of the emperor's.

AD 155 AVED, [Charles-François], [Chaumont en Bassigny], 1 juillet 1786. 2 pp.

Reports having just visited M. de Calonne for a position for himself, and asked him to remember the merited scientist [e.g., Adanson] who is neither used to nor has the time for soliciting and wasting his time in the "anti-chambres." Asks if he may stay with Adanson when in Paris, will pay for it and both will be perfectly free, but could have meals together, to relieve him from the tedium Adanson so often experiences.

AD 156 AVED, [Charles-François], [Paris], 27 aout 1786. 3 pp.

Writes that he failed to see Adanson at former address and did not want to interrupt him in his garden. Would have rented an empty room at Palais Royal no. 44 if the earlier proposal to live as neighbors had been possible, but notes that Adanson prefers absolute solitude. Has not had word from M. de Calonne for a conference. Will certainly mention Adanson to de Calonne and tell him of fame it will bring to his ministry if it will publish Adanson's interesting and numerous manuscripts. A list of subscribers should be made.

AD 157 AVED, [Charles-François], [Paris], 8 7bre [Sept.] [17]86. 3 pp.

Reports not being able to talk with de Calonne, although at his audience on 2 August he promised to see Aved's brother and him at his ease, but nothing was heard since. Asks Adanson to accompany him to Chaumont or Reclancourt until the opening of the Académie season.

AD 158 AVED DE LOIZEROLLES, [Jean-Simon] (1732–1794) [younger brother of Charles-François], Paris, 17 Aout 1787. 1 p.

Reports the sad news of the death of his brother, Charles-François Aved. Asks for the place where Adanson permitted Charles-François to deposit securities.

AD 159 AVED DE LOIZEROLLES, [Jean-Simon], Paris, 26 Mars 1793. 1 p.

Wants to purchase a copy of *Familles des plantes* for a friend, who cannot get it in any shop. The writer, an *avocat* before the Revolution, was executed in 1794, following a charge made against his son, whose name and age were changed in the documents to implicate the father. Ironically the verdict was reversed later; the father exonerated posthumously, and the property returned to his heirs.

Annotated, "Repondu le Mercredi 27 Mars 1793 a 9 h. matin," with draft of Adanson's reply on the letter noting that all spare copies have been given away and no profit has been realized from the book.

AD 160 BEAUVAIS RASEAU, _____, Paris, 9 Fevr. 1770. 2 pp.

Asks Adanson for the name of the author writing on drying of indigo leaves in India, of which Adanson had sent to him an extract.

AD 161 BEGUILLET, [Edme] [Avocat et Notaire de Dijon], Dijon, 10–13 Avril 1769. 11 pp.

Discusses *Familles des plantes* and emphasizes the importance of Adanson's *Species plantarum* [AD 268]; asks when this will appear. Requests a list of the "phrases" of grape varieties. Mentions the proposed new edition of Panckoucke's *Encyclopédie*. Defends Linnaeus, without being "Linnaeiste."

Adanson's draft of reply, dated Paris, 28 avril 1769, includes a harsh criticism of Linnaeus.

AD 162 BERLIERE,____, Trochereau de la, Feuillencourt près Saint-Germain-en-Laye, 18 May 1784. 3 pp.

Advises Adanson that he was asked to write chronological outline of the history of botany for a book to be printed in Orleans titled *Botanicon parisiense*, and that much of his material was derived from Adanson. Asks whether Tournefort knew of sexuality in flowers. Invites Adanson to visit him.

Annotated, "recu ... le 21." Adanson's draft of a reply, dated 22 May 1784, states that Tournefort did not know the sexuality of plants, though known to Theophrastus and much publicized by modern authors. Hopes to visit him at Saint-Germain.

AD 163 BERLIERE,____, Trochereau de la, Saint-Germain-en-Laye, 26 Aoust 1786. 2 pp.

Informs Adanson of the visit in France of Chevalier de Boufflers, governor of Senegal. Asks for a list of the most beautiful plants of Senegal.

Draft of reply dated 30 Aout 1786 is titled, *Catalogue des plus belles plantes du Senegal*, and lists nine genera with Ouolof names [cf. p. 20] and Linnaean synonyms in the species. Reviews some memories of Senegal experiences.

AD 164 BONNET, [Charles], Geneve, [written between 29 Sept. and 18 Dec. 1762]. 2 pp.

Writes of sending a copy of *Considerations sur les corps organisés* and asks for opinion on it. Discusses other publications of allied interest. Written by an amanuensis, signed by him. In the draft of reply, dated 19 Dec. 1762, Adanson states that he could not yet study the books. Discusses his effort to propose Bonnet for *associé étranger*, but "Linn" had the majority of the votes. Compares Bonnet and Linnaeus. Discusses leaf anatomy studies by Horace-Bénédict de Saussure (1740–1799) and by Guettard.

AD 165 BONNET, [Charles], Genève [postmarked], [ca.1763]. 1 p. [a portion of a larger letter].

Discusses his failing eyesight and admonishes Adanson to care for his eyes. Reports he writes in haste so that Adanson may reply quickly concerning Denmark. Sends a trinket in gratitude for proofs received of unnamed Adanson paper.

No annotations except subject heading. The missing part could have related to the Denmark proposal; this dates the fragment as about 1763. If so, the proofs referred to might be of *Familles des plantes*.

AD 166 BONNET, [Charles], Genthod près de Geneve, 23 Septembre 1769. 5 pp.

A reply to Adanson's letter of 30 Juillet (no draft in this collection), criticizing Bonnet's "Palingenesie." Defends himself, quotes in full a letter of Spallanzani of 11 Sept. 1769 on snail's head reproduction. Will treat Bomare more gently than Adanson did him, but was frank on his *Dictionnaire* deficiencies. Asks Adanson to show this letter to B. de Jussieu. Signed: "Palingénésiste."

No reply, [cf. AD 167].

AD 167 BONNET, Charles, Genthod près de Genève, 3 Mai 1775. 8 pp.

A part of 1 leaf is missing. Asks why there is no correspondence since his last letter, and cannot presume that it was offensive. Reports having cited Adanson in his paper "Sur la fécondation des plantes" in Rozier's *Journal de Physique, Nat. Hist.* Oct. 1774. Is amazed and awed by Adanson's plans for his *Encyclopédie universelle* [AD 8]. Advises him to publish his own discoveries first.

Discusses examples of cereal grain longevity, ascribing it to some role of *gelée organique* (protoplasm). Mentions that Spallanzani's book on snail reproduction may be delayed. Supposes *Tremella* to be more zoological than botanical. Signed: "le Palingénésiste."

Annotated with subject headings. Draft of reply (incomplete) dated 20 Juillet 1775 discusses *Encyclopédie* plans. Cites his belief that the number of species in all nature is 40,000, while others [perhaps inferring Linnaeus] consider it to be 14,684. Reviews seed longevity based on his wheat experiments concluding Bonnet's findings to be exceptionally high. Reports negative results on repetitions of Spallanzani's snail experiments, and a loss of confidence in his work in general. New *Tremella* studies convince him that their movements are not spontaneous.

AD 168 BONNET, [Charles], Genthod, 4 Fevrier 1780.

A reply to an Adanson letter not represented here. Advises him (1) to make more use of his shoes than of his pen (noting that he preaches to an "indocile" who refuses to listen); (2) to publish only that which he has totally mastered; and (3) to sleep enough. Reports that the first six volumes of his *Oeuvres* will soon be received by Adanson; is working on the next. Mentions Clason, Scottish philosopher, whom Adanson met during his visit in Genève.

AD 169 BONNET, [Charles], Genthod, 1 Septembre 1783. 3 pp.

Asks for a safe and prompt way to send the 3rd installment of 3 volumes of his *Oeuvre*, and inquires why Adanson was absent when he (Bonnet) visited the Paris Académie meeting to defend Adanson before those who were hasty to criticize him. Finds Adanson's *Tremella* observations interesting; suggests leniency for Corti.

Reply drafted at Neuilli sur Seine 9 8bre [Oct.] 1783. Explains absence from Academy meeting as: (1) his health did not permit him to sit quietly for so long; and (2) his advices were ignored so frequently, that he feels free to use his time for his own work. Writes that his remarks about Corti were never personal but advocates truth wherever he finds it. Does not like the modern trend of citing from letters of others without their consent because in letters things can be written that are not fit for printing.

AD 170 BUC'HOZ, [Joseph-Pierre], Nancy, 11 8bre [Oct.] 1764. 2 pp.

Sends the 3rd vol. of his *Histoire des plantes* [of Lorraine] to be presented to the Academy and also three smaller memoirs (*Pulice*, *Illecebra*, *Belemnite*) to be read at the Academy. Asks if he might become a *membre correspondant* of the Academy. Hopes Adanson will revise his plates.

AD 171 BUC'HOZ, [Joseph-Pierre], Nancy, 26 9bre [Nov.] 1764. 2 pp.

Reports sending his book [cf. AD 170] via M. Bombarde. Seeks Adanson, since he was kind to him when in Paris, as his mentor. Asks Adanson to supervise the preparation of his plates, being drawn and engraved by de Ferht. Praises the history of botany in *Familles des plantes*. Calls himself one of Adanson's "élèves." Asks Adanson's help to become a *membre correspondant* of the Académie.

A draft of the reply to these two letters, dated 6 Xbre [Dec.] 1764, reports that the book was received in a bad condition; criticizes the memoir on "Patar" and *Illecebra*, and notes that an account of *Belemnites* was treated at the Académie some years ago. Advises Buc'hoz to investigate new subjects that will honor the Academy. Did not receive the first two volumes of the Lorraine history of plants nor the Prospectus. Will be glad to supervise the plates. Replies with guarded comments to Buc'hoz's desire to be a member of the Académie, noting that he will seize the opportunity to act when Buc'hoz's accomplishments bring him to the attention of that body.

AD 172 BUC'HOZ, [Joseph-Pierre], Nancy, 6 Jan. 1765. 2 pp.

Reports sending the first three volumes of his *Histoire des plantes de Lorraine*. Received some plates and sketches, lacking some details recommended, from de Ferht. Reports receiving an annual grant from the city of Nancy in support of his work and for treating the poor with simples. Asks again to become a *membre correspondant* of the Académie.

The last request suggests that this letter was sent before receipt of Adanson's other reply.

AD 173 BUFFON, [Georges-Louis Leclerc], Comte de (1707–1788), Montbard, 8 Oct. 1770. 1 p.

Writes of impossibility for pension to be paid directly to Adanson; de Buffon will be in Paris the 12th and Adanson may come for pension on 13th. Observes that when one has just married a lovely young person, one has need of all his resources.

Adanson's reply dated "20 mai 1771," has draft of his letter on the back to le Comte de la Billarderie d'Angiviller [cf. AD 204].

AD 174 BUFFON, [Georges-Louis Leclerc, Comte de], Montbard, 25 May 1771.

Thanks Adanson for the compliments, sent on learning of the king's action in his behalf.

AD 175 CAPPY, _____, Paris, 16 Fevrier 1767.

An answer to Adanson's letter on construction of thermometers by de Réaumur. Believes that de Réaumur never made one with his own hands and gave only the principles.

AD 176 CARDOT, _____, Paris, 25 Messidor an 12 [14 July 1805]. 1 p.

Invitation to a meeting of the members of the Institut, belonging to the Légion d'Honneur, in the Eglise des Invalides, giving time, place of entrance, and dress.

Annotated with number and date.

AD 177 CAVANILLES, [Antonio José] Abbé, [Paris], 18 Janvier 1786. 1 p.

A short note accompanying a set of plates of Cavanilles' book [cf. AD 29].

AD 178 CAVANILLES, [Antonio José] Abbé, [Paris], [between 18 Jan. and March 1786]. 1 p.

Sends plate no. 35, missing from Adanson's collection, and apologizes for the long delay. Reports having seen a plant in de Jussieu's herbarium of Adanson's no. 132 from Senegal, which is incomplete; asks if he may see Adanson's specimen of it.

Annotations dated "18 janvier 1786," probably incorrect and added later by Adanson. No indication of a reply. The long delay referred to suggests that this plate 35, on the paper of the final printing [cf. AD 29], was prepared later than 18 Jan., the date in Cavanilles' hand on the first letter.

AD 179 COINDET, _____, Paris, 6 Juillet 1767.

Requests information for a friend, who according to a note of Adanson was J.-J. Rousseau, on Scheuchzer's *Agrostographie* and on botanical books in general.

Draft of reply is at top and interlineally.

AD 180 [Commissaire d'instruction publique], Paris, 26 Frimaire an 4 [17 Dec. 1795]. 1 p.

Reports Adanson's nomination as member of the Institut National, première classe, notes the first meeting will be next "primidi" [22 Dec. 1795]. Time and place added as postscript in a denser hand.

Annotated with date, subject, and name of Boquet, the secretary general. The signature is illegible, but is not Boquet. The letter has a printed heading: "Le Ministre de l'Intérieur," and in top left corner "Bureau," under this filled out by hand: "du Secrétaire." However, the signature is not Boquet's. The address bears a stamp: "Com.at d'instr.on publique."

AD 181 Compagnie des Indes, Paris, 3 Avril 1751. 1 p.

Reports that M. Montaran has been informed that Adanson wrote on a big tree of Senegal whose crushed leaves give a blue color. Adanson should send at first opportunity both green and dried leaves for experimental use in France. The *Conseil Supérieur de Sénégal* is to permit shipment in Compagnie vessels of his boxes of natural history materials. Signed by eight "Syndics et Directeurs" of the Compagnie, including David.

AD 182 Compagnie des Indes, Paris, 3 may 1752. 4 pp.

Received Adanson's report of 20 Feb. [1752], that the trees with blue coloring property are found only in the *Pays de Riodonone*, beyond Bissau. Advises that the *Conseil Supérieur* should order ships to Bissau for this wood, both for Adanson's experiments and to send to France. The Compagnie is pleased with Adanson's experiments noting that one sample is the true indigo. Adanson is to repeat the experiments on a large scale. The production cost and profit margin are to be determined, and the *Conseil Supérieur* is to cooperate fully. If Adanson's health deteriorates further while in Senegal, the Compagnie will allow him return to France in 1753 with his collections for the Jardin Royal. Bears ten signatures of the "Syndics et Directeurs," including David and Godeheu d'Igoville.

AD 183 CORTI, Bonaventura (1729–1813), Reggio di Modena, 4 9bre [Nov.] 1774. 3 pp.

Reports observations on *Tremella* and of seeing Adanson's paper after writing his results. Observed a spontaneous movement, saw dry plants return to life several times after being given water, and saw plants in the dark move towards the light. Mentions other microscopical observations briefly and suggests that there is no sharp line between animals and plants. Discusses the "sap movement" (i.e., protoplasmic movement) in *Chara* [cf. AD 38, 39].

Draft of reply dated 26 Fevrier 1775. Reports having read Corti's experiments to the Académie and to have made new experiments himself. Was not surprised by Corti's observations on *Tremella* but is surprised at those of M. Desmars, a Boulogne physician, who announced (*Journal oeconomique*, Apr. 1761) observing a comparable movement in *Conferva*, which seems to be far from the truth. Writes that Corti's experiments partly confirm his own and in part are

new discoveries, to be continued. Proposes that Corti repeat the *Conferva* experiments of Desmars. Adanson does not know of Corti's paper on "animalcules des infusions." Finds a great demarcation between plants and animals. Tried to verify Corti's observations on *Chara*, but the season was unfavorable. Does not dare to suppose that some animal entered the joints, whose intestine movement was taken for that of the plant. Notes that his judgment will be deferred pending further study.

AD 184 CORTI, Bonaventura, Reggio di Modena, 24 Mars 1775. 6 pp.

Thanks Adanson for the reply and sends the book requested, with an essay *Observations meteorologiques*. Wants to study the influence of electricity on plant growth and mentions, among other things, "worms" damaging wheat.

No annotations except subject headings and "j'ai repondu le 19 juillet 1775." The draft of the reply is dated "10 juillet 1775." Discusses the *Tremella* and *Conferva* situations in detail. Read with pleasure Corti's remarks on the *animalcula* of infusions, some of which appeared new to Adanson, telling how he began to study these under the eyes of Needham in 1745, leaving this study at the age of 48 to work on the encyclopedia. Mentions briefly the "worms" in the cereals and praises Corti's meteorological observations, suggesting that he add microclimatological data, e.g., soil temperatures, as Adanson did in Senegal. Also present is an early draft of his paper on *Tremella* [cf. AD 290] and a description of a *Chara* species from the Tuileries.

An undated and unfinished second draft of Adanson's reply of 4 pp. is also present.

AD 185 COVOLO, [Conte] Giovambatista dal, Bologna, 12 Gennajo [Jan.] 1765.

In Italian. Reports having seen a review of *Familles des plantes* in the newspaper. Sends his *Discorso delta irritabilita* and asks for Adanson to send his book together with price for same.

D'ALEMBERT. Cf. Alembert, [AD 139].

AD 186 CUSSON, [Pierre] (1727–1783), Montpellier, 13 Mars 1771. 3 pp.

Asks Adanson for seeds or specimens of different species of plants of the Parsnip family (Umbelliferae).

AD 187 CUSSON, [Pierre] Montpellier, 12 Aoust [*sic*] 1772. 4 pp.

Acknowledges a letter from Adanson via Mr. Imbert accompanying some umbelliferous plants or seeds; criticizes Linnaeus for some of his genera in his *Species plantarum* [3rd ed.?] and gives a list of umbellifers that he has not yet seen, with discussions of some species.

Annotated: "Repondu le 30 Aout 1772 et envoyé 21 pl. en herbier et 11 en graines" and added pertinent page numbers from *Familles des plantes*.

AD 188 CUSSON, [Pierre], Montpellier, 26 Octobre 1772. 4 pp.

Discusses and inquires about umbellifers, of which seeds had been sent by Adanson or were asked for.

Draft of reply written on available spaces and interlineally.

AD 189 DICK, Johann Jacob (1742–1775), Spietz près Berne [Switzerland], [before 1 Febr. 1771]. 1 pp.

The last page of a longer letter; of interest for its catalogue of plants wanted from Dick. The preserved part has in Adanson's handwriting the date 1771; Adanson's list is dated "[premier] fevrier 1771."

AD 190 DICK, [Johann Jacob], Bolligen près Berne, 10 Mars 1771.

Promises Adanson plants of his herbarium. Asks for fresh seeds for a small botanic garden. Adds list of desiderata, as de Jussieu or the gardener of the Jardin du Roi promised to send seeds in exchange for those he gave them during his short sojourn in Paris.

An annotated draft of Adanson's reply, dated "6 avril 1771," sent with a packet of seeds from de Jussieu, to which Adanson added other seeds. A list is added of the plants Adanson received.

AD 191 DIDOT, P[ierre]-Fr[ancois] *le jeune*, [Paris], 4 Mai 1771. 2 pp.

Explains offer made to Adanson on behalf of Didot by Monsieur Audry, with Monsieur le Begue as an intermediary. The prospect of a tax on the paper frightened the publishers considerably. Each set aside his own affairs for a general meeting to consider what should be done, resulting in more than 15 days of work. Time is not favorable to undertake a work that could ruin Didot. Monsieur Audry negotiated without Didot's knowledge, Didot gives M. le Begue the available copy of the *Dictionnaire du Jardinier*.

AD 192 DUHAMEL DU MONCEAU, [Henri-Louis], Paris, [ca.1765]. 2 pp.

Sends Adanson a small publication [AD 52], in which he included all of the new information on the subject [madder], especially the discovery of M. Dambournay [or D'Ambourney, Louis-Antoine (1722–1795)]. Asks Adanson for the Académie report on this as soon as possible.

AD 193 DUHAMEL DU MONCEAU, [Henri-Louis], [Paris], 3 Mai 1772. 3 pp.

Because Adanson was named "Commissaire" for Duhamel's *Traité de la pesche*, the second part will be sent to Adanson for review. Inasmuch as Duhamel leaves Paris until Pentecost, he asks for completion of the report before his return, and that Adanson arrange with de Jussieu both for the report and to have the approbation of the Academy signed by M. de Fouchy, and to be delivered to M. Delatour, printer.

AD 194 FONTANA, Felice (1731–1805), [Florence, ca.1767]. 2 pp.

Has read *Familles des plantes*. Requests information on the movement in Equisetum spores, called “poussière genitale” by Adanson and believed by Fontana to be seeds, but he did not understand what Adanson meant in his book, lacking plates to illustrate the point.

No annotations. Was filed with Adanson’s *Mémoire sur le mouvement* (AD 276).

AD 195 HALLER, [Albert von], Berne, 29 Dec. 1772. 1 p.

Announces sending of packet of plants and a memoir on a plant called Scopuline; mentions a singular case of pregnancy; comments on the botanists Banks, Solander, Forster, and Rottböhl; will be glad to receive plants from Adanson as well as bibliographical indices, good catalogues, even of Linnaeus.

Draft of Adanson’s reply, Paris 15 Mars 1773, is written on this page.

AD 196 HALLER, [Albert von], Berne, 26 Avril 1773. 1 p.

Sends a drawing of a monstrosity and of a tree. As he did not select the plants of the former packet himself, some common plants may have slipped in. Some named by Adanson as *Ledum*, *Pyrola umbellata*, *Stratiotes*, are not Swiss. Asks for an African *Aralia*. Has no picture of the singular pregnancy. Discusses a membrane of a horse, the object of controversy between Dem ... [illegible] and Decsemet is involved. His drawings are not present in this collection.

AD 197 IMBERT, _____, Paris, 11 Juillet 1774. 2 pp.

Letter to Adanson on behalf of Cusson, of Montpellier, whose letter is cited at length. Cusson hopes soon to offer seeds to Adanson and asks especially for seeds of Tournefort’s species of Umbelliferae (Parsnip family) from the Levant and a loan of herbarium specimens of these. No annotations except subject heading. Was filed with the Cusson letters (AD 185–187).

AD 198 JOYEUSE, [B.] *l’ainé* [“*écrivain principal de la marine.*”], Marseille, 6 Avril 1767. 4 pp.

Discusses certain points in *Familles des plantes*, especially corals, sap function, diseases, sowing time; asks if a later edition has appeared.

Draft of reply is present.

AD 199 JOYEUSE, [B.] *l’ainé*, Marseille, 6 Juillet 1767. 3 pp.

Discusses invention for preserving fresh water on vessels at sea; hopes to interest the King’s court in it. Promises to send a packet with wheat to Adanson. Will prepare memoir for Adanson on a wheat-damaging insect. Says he has established agricultural experiments at “Plattebandes,” where alfalfa has been grown successfully. Asks what formalities are needed to become correspondent of the Academy. (The number of correspondents was reduced to 100 since 1765.)

Annotated.

AD 200 JOYEUSE, [B.] *l'ainé*, Marseille, 11 Nov. 1768.

Sends Adanson a book, awarded a prize by the Academy of Limoges and previously judged favorably by Adanson.

AD 201 JUSSIEU, [Antoine-Laurent de], [Paris, 4 Nov. 1779]. 1 p.

Reports that at the next meeting of the Academy a prize for botany will be proposed for the best answer, if Adanson approves, on the question “L’ordre naturel existe-t-il dans les plantes? Quelles sont les preuves de son existence, et les principes qui lui servent de base? Quelle seroit l’utilité de sa découverte.” An explanation should be added as to what is meant by *ordre naturel*, and by its differences from the artificial *méthodes*, and that there be included a concise survey of other authors’ opinions on the subject, with a note on what the Academy wants. This question may be useful to keep persons working on the natural order who are beginning to revert to artificial “*méthodes*.” Says that he has written today to Duhamel and Fougereux to invite their approval of this proposal, noting that M. Guettard is absent, that M. de Lamarck approves, and that M. Brisson is thought to approve also. If Adanson has another more interesting proposal, he is asked to send it to his “confrères,” then “Dejussieu altera sa décision” (de Jussieu will alter his decision) [both AD 201 and AD 202 are unsigned and written in the third person].

Annotated: “Repondu le vendredi 5 9bre [Nov.] 1779 à M. de Jussieu qui avoit écrit ceci chez moi le jeudi 4. soir.” plus his subject heading. Accompanied with a two-page draft of his reply, dated 5 9bre [Nov.] 1779. In this Adanson writes that the Academy cannot propose this question without making itself ridiculous for three reasons: (1) the metaphysical ideas on the *ordre naturel* are not yet sufficiently clear, (2) the number of *connaissances* on the plants is not yet sufficient, and (3) finally the necessary proofs to support this natural order demand not an academic memoir but a large number of volumes. Adanson believes the Academy will have more honor if it will propose a question on the useful part of botany, such as economics, agriculture, or horticulture, and will refer de Jussieu to what will be proposed by his colleagues Duhamel, Guettard, Tillet, Fougereux, Lemonnier.

AD 202 [JUSSIÉU, Antoine-Laurent de], [Paris], 20 Février 1783. 1 p.

Sends Adanson a report on a paper *Des Mousses* and another *précis* of Palisot de Beauvois and requests him to report on these or to send the papers to him, giving on separate sheets his advice on the several points of the report.

Annotated by G. de R[ocquigny]-A[danson]: “ce billet est d’Antoine-Laurent de Jussieu.”

AD 203 JUSSIÉU, Bernard de (1699–1776), Paris, Aoust 1762. 5 pp.

Letter to Adanson, then in Caen, containing instructions for his travel in western France, giving explicit information on the locations of some plants, fossils, and animals, and mentioning

persons he may visit. Mentions that he has not yet received anything from the printer [of *Familles des plantes*]. Bears signs of wear, probably in this voyage by Adanson. One of the relatively few letters known of this botanist.

AD 204 LA BILLARDERIE [Comte] d'Angiviller, [Charles-Claude] (1730–1809), [Versailles], 25 Mai 1771. 2 pp.

Draft of reply to a letter of Adanson dated 20 May 1771 in which Adanson congratulates La Billarderie with his appointment as successor to the “intendance du jardin et du cabinet” [d'histoire naturelle] of Louis XV. Annotated with subject and dates concerning de Buffon and La Billarderie. Draft of Adanson's letter on separate leaf; this reply of La Billarderie, who became “directeur-général des bâtiments et jardins” in 1774, is in polite terms.

Cuvier judged his policy favorable to the development of the Jardin des Plantes in Paris in his *éloge* of Thouin, however, the disappearance of the Trianon garden, in which Adanson was interested, could not have been prevented. [Comte La Billarderie is not to be confused with the botanist La Billardiére.]

AD 205 LACOMBE, _____ (editor of *l'Avantcoureur*), Paris, 28 fevrier 1767. 1 p.

Asks Adanson to prepare a note on his lecture at the Académie on meteorological observations and natural history, for otherwise the public will not be able to enjoy it before the volumes of the Académie appear (usually a lapse of some years). The note can be sent either to Lacombe or to M. Marquer [?], “mon ami” at the Académie.

Draft of reply notes that Adanson sends the report to *l'Avantcoureur* and apologizes for the brevity because he is going on an eight-day voyage for his health. It is puzzling to find this note in *l'Avantcoureur* of 16 February 1767, pp. 153–155. The possibility of this journal being two weeks behind schedule is unlikely. Moreover, comparison of the printed account with Adanson's draft shows it to contain more information than is in this draft. Perhaps Lacombe published an account of Adanson's lecture, e.g., one by his friend at the Academy, and was then warned to ask Adanson himself before he got angry.

AD 206 LACOMBE, _____, Paris, 8 Mars 1767. 1 p.

Sends Adanson the number of *l'Avantcoureur* with the notice of his lecture and the others appeared earlier and in the same year; will be obliged to receive further notices from time to time.

Draft of reply dated on the front 13 mars 1767 and on the back 26 mars 1767. Reports that he has read a paper at the Academy on the movement of *Tremella* (cf. AD 276) and contributes a notice concerning this for *l'Avantcoureur*. This was published in the issue dated 6 Avril 1767, pp. 215–218, with slight alterations.

AD 207 LA LUZERNE, [César-Henri, Comte de], Paris, 4 Oct. 1785. 2 pp.

Writes that he is in command of Saint-Domingue on nearly the same latitude as Senegal and that M. de Malesherbes, his uncle, and M. le Lieutenant Civil, his father-in-law, have encouraged him to ask what products of Senegal are worthy of introduction in Saint-Domingue. Invites Adanson to have dinner with him.

Undated draft of reply, 3 pp., includes a plant list with vernacular Senegalese names, suggests also some animals, including the elephant and camel.

AD 208 LEFEBURE DESHAYE [RES, Chevalier] Tivoli, quartier de la nouvelle Plymouth, par la ville des Cayes dufond-de-Lisle-de-vache, partie de Sud de S[ai]n[t-] Domingue [Haiti], le 16 aout 1778. 4 pp.

Reports on difficulties of studying botany and medicinal properties of tropical American plants; sends drawings and descriptions.

Draft of reply, dated 24 Avril 1779 scribbled on back and front, discusses about five genera.

AD 209 [LEMAUX, Mademoiselle,____, Undated]. 1 p.

Concerns Adanson's wheat experiments. Cf. also AD 140.

Originally filed in *Dictionnaire de Botanique*.

AD 210 LEMOINE,____, (Avocat) Macon, 7 Mars 1766. 2 pp.

Addressed to "Messieurs Adanson et Andriot chez Monsieur Adanson." Concerns wheat and grape (*Vitis*) culture; could not fulfill all the demands of Adanson. Originator sometimes signs self as Lemoine de Chateau.

Draft of reply dated 23 Mars 1766.

AD 211 LEMOINE,____, Macon, 28 aoust 1766. 2 pp.

Mentions that he has not forgotten what Adanson taught him and has tested these views since through his work on an herbarium of grapes, which he hopes to present to Adanson. Most of the letter relates to a business activities concerning Cayes, Saint-Domingue [Haiti], on the part of a brother and brother-in-law of Lemoine.

Annotated: Draft of a detailed reply of 4 September 1766 is given. See also AD 208.

AD 212 LEMOINE,____, Macon, 2 janvier 1767. 3 pp. + 1 leaf

Will send samples of grape cultivars of the region with names and usage; mentions persons possibly interested in economic botany.

Draft of reply dated 23 janvier 1767 written on back.

AD 213 LEMOINE,____, Macon, 29 janvier 1767. 17 pp.

Treats grape cultivars in the Macon area. In this letter signs self as Lemoine de Chateau.

No annotations except subject heading. Macon is spelled without cedilla although Adanson writes one (ç) in the heading of this letter.

AD 214 LEMOINE,____, Macon, 29 janvier 1767. 3 pp. + 1 leaf

Mentions his other letter of the same date. Discusses cultivars of grapes and wheat.

Annotated.

AD 215 MARCORELLE,____, Narbonne, Le 9^e Janvier 1766. 2 pp.

Reports that corrections requested by the Academy have been made for his *Mémoire sur le Salicor [Salsola soda]* and sent to M. de Fouchy. He hopes Adanson will report on it and asks for indulgence and pardon for mistakes. This *Mémoire* is AD 367.

AD 216 MARCORELLE,____, Narbonne, le 9 Janvier 1766. 3 pp.

Addressed to M. de Fouchy.

Sends the revised *Mémoire sur le Salicor* with additions and alterations suggested by de Jussieu and Adanson: hopes they will soon report. Asks for information on action taken on his report to the Academy of a flood at Roussillon 16 October 1763.

AD 217 MASSAC, M. de, Paris, 15 mai 1767. 1 p.

Sends his *Mémoire sur l'engrais* [cf. AD 94].

AD 218 MONTEHERMOSO, M[arqués de] (Colonel in the Spanish cavalry), Cadix, 17 Decembre 1770. 4 pp.

Sends a work of Miguel Barnades; mentions the favorable judgment of Adanson on the first volume of the *Mémoires de la Société de Biscaye*; discusses marl at length, and the fodder plant alfalfa briefly.

Reply written on back, dated “12 janvier 1771.”

AD 219 MONTEHERMOSO, M[arqués de], Cadiz, ce 22 Février 1771. 3 pp.

Thanks Adanson for becoming a member of the *Société [de Biscaye]*. Mentions soils, alludes to a visit of Adanson to Spain and the formation of a new academy in Spain.

Reply possibly begun on first page and the complete reply is on a separate small paper of 4 pages, dated “22 mai 1771.”

AD 220 MOUTANDOUIN, _____ (écuyer), Nantes, 20 mars 1779. 3 pp.

Mentions a letter of LeFebure Deshaies, S. Dominique (see AD 208), and asks how to send materials to Paris.

Reply written on 3rd page, dated “24 avril 1779.” Moutandouin was a *Membre correspondant* of the Académie.

AD 221 MUTIS, J[osé] C[elestino] (1732–1808), Madrid, 30 Juin 1760.

Answers a letter from Adanson, writing that he will keep the instructions, and subsequent developments, secret and transmit them only to Adanson; mentions need for six thermometers.

With this letter of Mutis is a draft of Adanson’s original letter to him, referring to an expedition to South America (Colombia), where Mutis spent much of his life developing the natural sciences of medicine and botany.

AD 222 MUTIS, J[osé] C[elestino], Santa Fé de Bogota [Colombia], 9 Août 1764. 5 pp.

Reports the six thermometers not received. Used one from London, divided according to Fahrenheit. Gives meteorological information and data on an earthquake.

Annotated.

AD 223 NECKER, [Noel] J[oseph] de (1729–1793), Mannheim, ce 12° Fevr. 1771. 4 pp.

Sends Adanson his book on mosses [AD 100] and discusses moss reproduction.

AD 224 NECKER, [Noel Joseph] de, Mannheim, ce 1° avril 1771. 3 pp.

Announces sending Adanson his *Methodus muscorum* [AD 100] and the longer accompanying letter [AD 223].

AD 225 NOGARET, [Francois-] Félix (1740–1831), [Paris], 1 Ventose an 8 [20 February 1800]. 1 p.

Asks for Adanson’s short and considered opinion on the place of the mosses as bridging the separation between the vegetable and the mineral kingdom.

Draft of reply is to two questions of Nogaret on the same leaf, dated 21 fevrier 1800. To the first question, Adanson answers that he believes the *Dendrites* to have originated from sulfurous, bituminous or even metallic vapours in the fissures of stones, to be closest to the vegetable kingdom because they resemble mosses. The mosses, from the plant side, approach the minerals

by being of a drier, less “ligneuse” substance and without losing their structure in fire. The second question answered by Adanson is: If the kernel of a garden peach produces only a wild race of peach, from whence came the first peaches with fruits of all degrees of quality up to the most excellent? Adanson replies that the common opinion must be rectified: by sowing each year kernels of the same peach-, apricot-, prune- and cherry-trees etc., one will get nearly as many fruit varieties as is the number of kernels sown; but that by grafting the best, one may conserve and ameliorate by degrees to the highest possible perfection. This, he writes, is based on his experience with melons of which he recognizes 92,000 possible combinations.

AD 226 NOGARET, [François-] Félix, [Paris], 16 Fructidor an 8 [3 September 1800]. 1 p.

Asks Adanson if he is mistaken in thinking that all irritable plants are of American origin and that there are no original plants of this group in Europe. Thinks this because Adanson distinguished between the viscous flycatchers and the sensitive plants. Asks especially about “les plantes mimoses.”

Draft of reply on separate leaf, dated “4 7bre [Nov.] 1800.” Adanson replies yes, *mon cher Anakréon*, that he is wrong in thinking that all irritable plants or “mimosés” originate from America, and elaborates on this answer. Thus making it clear that Nogaret sought information for a novel on ancient Greece.

AD 227 [NOGARET, François-Félix], [Paris], 8 Messidor an 9 [27 juin 1801]. 1 p.

Reports he was requested to hand Adanson the “Carte de Botanique” [AD 48] but has not the time to do it himself.

No annotations except date added by Adanson. The pseudonym “Aristenète” was identified by Adanson in an annotation in the book.

AD 228 PARMENTIER, [Antoine-Augustin] (1737–1813)

“Notice des Titres que Ecrivit M. Parmentier Censeur Roial, et Professeur de l’Ecole de Boulangerie, pour Reclamer en sa faveur l’indulgence de l’Académie.”

Addressed to the Académie. Contains an enumeration of his publications from 1774–1779. Accompanied by a note asking Adanson to support his application “pour la place vacante dans la classe de botanique et d’agriculture.”

AD 229 ROYER, _____, Paris, 29 8bre [October] 1786. 3 pp.

Concerns 1,200 copper-plates of an exotic herbal, moreover plates of Plumier’s American plants; asks for a meeting with Adanson.

Annotated. A meeting was agreed on but never materialized.

AD 230 ROZIER, [François] (1734–1793), Paris, 28 juin 1771.

Sends wash-drawings of different grape varieties to Adanson and asks for the botanical “word and phrase” that characterizes them; asks names of moths that damage grapes.

AD 231 SCHOULEMBOURG, _____, Baron de Bourg Scheidegg, [Saxony], 12 Mars 1767.

Thanks Adanson for the kindness received during his stay in Paris, and sends him seeds of Polish cereal grains.

Draft of reply dated “4 mai 1767.”

AD 232 SCHREBER, [Johann Christian Daniel] (1739–1810), Leipzig, 20 Janv. 1768. 1 p.

Reports that M. de Schoulembourg has talked about Adanson in such a way that Schreber does not hesitate to take the liberty to write Adanson of it. Is working on a paper on grasses, for which the plates are being engraved by a “trés habile graveur” Crusius; asks Adanson for seed or specimens of *Zizania aquatica*.

Draft of reply dated “13 Mars 1768.”

AD 233 SCHREBER, [Johann Christian Daniel], Eriangen, le 16 Mars 1771. 1 p.

Announces his appointment as Professor; is establishing a garden and planning a hothouse according to the plans in Adanson’s *Familles des plantes*; asks for information for including trees in it and for a third volume of *Familles des plantes* treating genera and species.

Annotated: “j’ai répondu le 16 avril 1771, remis à M. Duchêne.”

AD 234 SCOPOLI, [Johann Anton] (1723–1788), Idria, 23 Xbris [December] 1764. 2 pp.

Written in Latin. Admires the enormous work in the *Familles des plantes*; makes specific remarks on place of certain plants in Adanson’s *méthod*.

Draft of reply, dated 10 Fevrier 1769, explains point for point and tells how, by comparison of all characters, some may be important when they are constant for families, even little-known anatomical characters.

AD 235 SCOPOLI, [Johann Anton], Ticini, 2da. Junij 1784. 2 pp.

In Latin. Recommends Alojsium Castiglioni to Adanson. Apparently Luigi Castiglioni (1757–1832), writing a *voyage* to the U.S. in Italian, with a second volume on botany.

AD 236 SONNERAT, [Pierre] (1749–1814), L’Isle de France [Mauritius], le 16 Aoust 1775.

Mentions his work being thwarted by an officer [*intendant*] on the island and is unable to do much; plans a *voyage* to China, via India, etc. Gives particulars on his *voyage*.

Draft of reply dated “6 Fevrier 1776,” containing five points.

AD 237 SONNERAT, [Pierre], Canton [China], 29 decembre 1776. 8 pp.

Accounts for his travels and some collections and shipments from Isle de France (Mauritius) to China; received by Adanson in July 1777 together with a herbarium. This letter was accompanied by the manuscript: *Observations sur L’Inde et La Chine* [AD 376].

Annotated as received “juillet 1777” by Adanson with a draft of Adanson’s reply dated 1 9bre [November] 1777.

AD 238 SONNERAT, [Pierre], Isle de France, ce 1 Sepbre 1779. 4 pp.

Narrative account giving particulars on India and the conquering of Mauritius by the British.

Short annotations.

AD 239 SONNERAT, [Pierre], [Paris, ca.1782]. 1 p.

Sends Adanson a copy of his “*Voyage ...*” [AD 121].

AD 240 SONNERAT, [Pierre], Cadix, 25 fevrier 1785. 3 pp.

Mentions briefly his adventures and his collections on his *voyages*.

Short annotations.

AD 241 SONNERAT, [Pierre], Pondicheri, 20 juin 1788. 3 pp.

Reports a previous shipment sent on a subsequently wrecked vessel, of which something appears to have been rescued. Mentions a *voyage* he made to Ceylon, discovering interesting animals and minerals, and says he hopes to be sent to Cochin-China.

Short annotations. Previous shipment not received.

AD 242 TEMPLEMAN, Pierre [Peter] (1711–1769), Londres, le 29 Juillet 1760.

Writes as Secretary of Society for Advancement of Arts, Manufacture and Commerce, to the Académie asking for pasture grasses able to produce green fodder in winter, since animals in Britain have to resort to some nourishment, which could also be expected in France [cf. AD 340].

AD 243 THOUIN, [André] (1747–1824), [Paris], Jardin du Roy, 25 fevrier 1773. 1 p.

Sends Medicus’ *Index plantarum ...* [AD 95] to Adanson on behalf of the author

AD 244 TOURNON, [Dominique Jerome] (ca.1770–ca.1827), Toulouse, le 9 Dec. 1786. 3 pp.

Has been studying plants for three years, changed from Tournefort to Linnaeus, then found Adanson's *Familles des plantes* more useful than all works read before. Indicates plans for a *flore tolosana* [which he published in 1811; 2nd ed., unchanged, 1827] and asks advice of Adanson.

No indication of a reply.

AD 245 WÜRTZ, [Georg Christopher], Strasbourg, ce 26 Xbre. [December] 1784. 1 p.

Sends copy of his thesis [AD 127].

Annotated "Reçu le 3 fevrier 1785."

Manuscripts

The manuscripts cited and described below have been selected from among several thousand leaves in this collection of Adansoniana because they offer new information relative to our knowledge of Michel Adanson's life and time, his scientific work and program, and to the activities of some of his colleagues and contemporaries. Those of his papers that can be dated are given first—in chronological sequence, followed by those of either unknown or mixed dates—in alphabetic sequence of titles. Manuscripts originated by other persons follow in alphabetic sequence by name of originator. All rectos and versos of the manuscripts as well as any ephemera were scanned and are included in the PDFs.

AD 246 [ADANSON, Aglaé] (1775–1852) *Noms des differens hois donnés à Emile avec leur synonymie et leur pays originaire pris dans le Parc de Baleine en 1848*
4 pp. 21 × 28 cm

An alphabetical list of Latin names of woody species of plants, originally in Aglaé's copy of her *Catalogue* [AD 2].

AD 247 ADANSON, Jean-Baptiste (1732–1804) *Description des plantes de l'Egypte*
25 pp. with 12 drawings. 16 × 22.5 cm

Of interest since many of the manuscripts and drawings of Michel Adanson's brother are supposed to have been lost.

AD 248 [ADANSON, Jean-Baptiste] *Note & description de quelques plantes arbres, arbustes et autres inserés dans le premier cayer de l'herbier envoyé a Madame de Rohan Comtesse de Marsan*
20 pp. n.d. 19 × 24 cm

Although unsigned, this is without doubt written by Jean-Baptiste; many Arabic plant names are cited in the list and the handwriting is that of AD 247. One separate leaf bears annotations by Michel Adanson.

AD 249 ADANSON, Michel *Hortus regius Parisiensis 1740–1747*
282 pp. [Bound in a vellum cover bearing several examples of handwriting.] 12 × 18 cm

Collationé Adanson No. 85. A working copy of a list of the plants in the Jardin Royal in Paris, with many additions, including (on p. 1) references to Linnaeus' *Species plantarum* (1753). The title given here was written later. The original heading on p. 1 was *Plantes herbes Liliacees. Ie Lecon*. The contents are arranged essentially according to Tournefort's system.

AD 250 ADANSON, Michel *Hortus regius Parisiensis 1740–1761. Basileiophyton*
10 + 58 pp. 11 × 16.5 cm

Collationé Adanson No. 84. A shorter list than AD 249, also arranged close to that of Tournefort's system. See also the notes with AD 258.

AD 251 ADANSON, Michel *Systema naturale*
2 pp. 1748–1749. 20 × 32 cm

A survey of the characters distinguishing the three kingdoms of natural history. According to Adanson's annotations, this was written in Senegal in 1748 and 1749.

AD 252 ADANSON, Michel [*Plantes du Sénégal. Descriptions*]
20 pp. [1748–1749.] 18 × 24 cm

Comprises Latin descriptions of plants collected by Adanson in Senegal. The order not numerical, yet has included herbarium number as primary reference. Some Ouolof names and some Latin generic names are added. Prepared in Senegal, but without exact date.

AD 253 ADANSON, Michel *Plantes seches envoyées du Senegal*
18 pp. [1748–1754.] 11 × 16 cm

A numerical list of plants collected by Adanson in Senegal and sent to France, with short descriptive phrases for characterization. Includes items to No. 233, but for many numbers two or more plants are mentioned, designated by letters. This copy is in the hand of Bernard de Jussieu.

AD 254 ADANSON, Michel *Essai des teintures*
45 pp. 1751–1752. Mostly 12 × 19 cm

A collection of Adanson's data sheets and studies of his experiments on vegetable dyes, especially indigo, and including a description of the method for preparing indigo in Senegal, with his calculations for probable production costs and anticipated profits [cf. AD 181,182].

AD 255 ADANSON, Michel *Observations sur la culture des plantes ...*

6 pp. 20 May 1752. 20.5 × 32.5 cm

A finely written treatise on culture of plants in general and especially of European vegetables and of fruit trees in Senegal.

AD 256 ADANSON, Michel *Methode de decrire par articles*

11 pp. 1753. Written on an assortment of sheets of different sizes, mostly 32 × 41.5 cm.

One is a broadsheet with columns for all possible characters useful when preparing a plant description, filled out for the baobab tree [*Adansonia*] as an example.

Annotated by Adanson to have been conceived by him in Senegal in 1750 and perfected in 1753.

AD 257 ADANSON, Michel *Vocabulaire universel d'histoire naturelle*

1,000 pp. 1754–1788. [Bound.] 22 × 33 cm

An alphabetic list of the “noms simples” of all organisms in natural history, with their synonyms. Included are generic names of his *Familles des plantes* equated with those of other authors. The number of names in this work was estimated by Adanson to be about 200,000. Many additional leaves have been intercalated.

AD 258 ADANSON, Michel *Basileiophyton No. 3*

200 pp. 1755(?). [Bound.] 16 × 20 cm

Collationé Adanson No. 83. Annotated: “Catalogue du Jardin royal de Paris rangés suivant mes familles des plantes copiées de dessus mon petit cahier avec mes notes spécifiques par M. Bombarde en 1755. Ce cahier étoit le cahier sur lequel M. de Bombarde fit ranger son jardin botanique situé sur le terrain des Chartreux près la Barrière de N[otre] D[ame] des petits champs à Paris, par M. Gérard, Medecin de Provence qui publia en 1762 d'après quelques unes de mes idées et mes familles son flora gallo-provincialis.” The copy is carefully written in a handwriting unlike Adanson's. The date, 1755, given above shows evidence of alteration. Adanson's original mss. is not in this collection.

AD 259 ADANSON, Michel À *Monseigneur le Duc D'Ayen*

2 pp. [1756–1757.] 17 × 22 cm

Adanson's handwritten dedication to the Duc d'Ayen for his *Histoire Naturelle du Sénégal* (1757) [AD4J. Signed by the Duke. Originally filed with the *Approbation* of the Académie [AD 359].

AD 260 ADANSON, Michel *Carte générale du Sénégal*

1 p. July 1757.

Original manuscript map, on an older printed map, of that published in Adanson's *Histoire naturelle du Sénégal* (1757) [AD 4]. The drawing, executed by Philippe Buache, bears many corrections and additions by Adanson.

AD 261 ADANSON, Michel *Observations sur la végétation à Paris 1757*
3 pp. 1757 [with additions up to 1761]. 11 × 17.5, 18.5 × 24 cm

Phenological observations of Adanson on the development of leaves and flowers of different plants.

AD 262 ADANSON, Michel *Nouvele construction des serres*
2 pp. [1759–1763.] 22 × 34 cm

The original drawings for the plate on Adanson's *Familles des plantes* with a sketch showing the desired arrangement of the partial drawings.

AD 263 ADANSON, Michel *Plan d'un ouvrage général sur la botanique*
20 pp. 18 × 23 cm [Rough draft]; 29 pp. 20.5 × 32 cm [Final draft] 1759.

The manuscript, in two drafts, of Adanson's announcement of his *Familles des plantes* read at the Académie on the occasion of the "rentrée publique de la Saint-Martin" on 14 November 1759.

AD 264 ADANSON, Michel *Jugement sur mes Familles des plantes*
35 pp. 1764. 11.5 × 17 cm

A list of reviews from current journals of Adanson's *Familles des plantes*. Included is a draft of Adanson's summary of the book, dated 21 Mars 1764, with the names of the journals to which this summary was sent. There is also a draft of a short letter of the same date to Monsieur Roux, editor of the *Journal de Médecine*, in which Adanson tells him that he left a copy of the book in the porch of his house the day before and now sends a copy of the abstract to spare him the trouble of reading the volumes.

AD 265 ADANSON, Michel *Plan de la préface istorike de la botanike*
10 pp. [1764.] 11.5 × 17.5 cm

An enumeration of the contents, with page numbers, of the history of botany in the first volume of his *Familles des plantes*.

AD 266 ADANSON, Michel *Remarques sur les blés miracles, et découverte d'un orge de miracle*
9 pp. 1765. 17–21 × 22–32 cm

Three slightly different drafts of a paper read at the Académie on 9 August 1765 on barley with branched culms.

Annotations relate that the *orge de miracle* was shown at the Académie in 1764; that M. de Fouchy only wanted to make mention of this fact in the *Histoire de l'Académie* for 1765. This paper was printed in the *Mémoire de l'Académie des Sciences, Paris* 1765: 613–619. 1768.

AD 267 ADANSON, Michel *Réponse aux diverses critiques qui ont paru de l'ouvrage intitulé Familles des plantes*
6 pp. [ca.1765.] 11 × 17 cm

Adanson's reply to criticisms of his *Familles des plantes*, especially that by Duchesne in his *Manuel de botanique* (Paris, 1764) defending the priority of his natural families against insinuation of plagiarism of Bernard de Jussieu's natural classification.

AD 268 ADANSON, Michel [*Les genres des plantes; matériaux préparés en prévision d'une nouvelle édition des Familles des plantes, présentant les sus-dites familles en tableaux de 6 à 8 colonnes*]
389 pp. [no date, probably between 1766 and 1769.] 17 × 22 cm

Adanson's assignment and treatment of species within genera in the same manner as he treated genera within families in his *Familles des plantes*. This certainly is the work referred to in some of the letters of Adanson's correspondents and is useful for clarification of Adanson's concept of his genera. However, not all the families are included in this manuscript.

AD 269 ADANSON, Michel *Résumé de sentiment et des erreurs de Duchesne sur les fraisiers*
2 pp. [ca.1766.] 17 × 22 cm

Criticism by Adanson of Antoine-Nicolas Duchesne's *Histoire naturelle des fraisiers* (Paris, 1766), written on the backs of cancelled pages of the preceding number [AD 268] containing *Fragaria*.

AD 270 ADANSON, Michel *Froid où les végétaux comencent à souffrir et périssent en 1766*
2 pp. 1766–1776. 10.5 × 16.5 cm

Adanson's observations on the effect of low temperatures on plants during the period of 1765 to 1767, placed in a large folio cover of a later date with a heading indicating his plan to prepare a paper on this for the Académie, which apparently was not done.

AD 271 ADANSON, Michel *Catalogue de mes livres*
4 pp. [ca.1767–1768.] 22.5 × 35 cm

A manuscript catalogue of the library of Adanson, classified by subjects, with additional entries to 168. Numbers were added to these items, referred to as "collationé" numbers, which he wrote on the title pages of his books.

AD 272 ADANSON, Michel [*Extrait et critique de*] Dubourg, *un petit ouvrage intitulé Le botaniste ou notice des plantes qui se trouvent aux environs de Paris*
2 pp. [ca.1767.] 11.5 × 18 cm

Summary and criticisms of Jacques Barbeu-Dubourg (1709–1779) *Le botaniste français, comprenant toutes les plantes communes et usuelles disposées suivant une nouvelle méthode et décrites en langue vulgaire* (Paris, 1767). Adanson alleges the classes proposed by Dubourg to be unnatural, and the treatment of families, extracted from Adanson's *Familles des plantes*, to be extremely abbreviated.

AD 273 ADANSON, Michel *Connaissance des Blés*
7 pp. [ca.1767–1768.] 22.5 × 35 cm

Draft of a questionnaire concerning samples of wheat and of soils on which they are grown in different countries, to be sent to the French “ministres plénipotentiaires” in those countries. Includes also papers on Adanson's experiments on wheat varieties, their soils, and their cultivation, including a list of things to be done, dated “15 janv. 1768.” Contained in a folder titled *27^e Mémoire. Sur la distinction des diverses espèces de Blé froment.*

AD 274 ADANSON, Michel *Extraits des observations météorologiques faites à la campagne près de Paris ...*
4 pp. + 1/2 leaf tipped in. 1766. 22.5 × 34 cm

Manuscript of a paper read at the Académie 31 January 1767 and published in the *Mémoires* 1778: 425–433. 1781. An abstract was published in *L'Avant-coureur* 1767: 153–155, 16 fevrier 1767 [cf. AD 205].

AD 275 ADANSON, Michel *Questions* [concernant un bien à Villeneuve au Roy].
16 pp. [1767.] 26 × 46, 17–20 × 22–24 cm

Lists of questions and some maps concerning the possible purchase of a property at Villeneuve au Roy (Allier), suggested to Adanson by C. F. Aved and originally filed with the latter's ten letters [AD 141–150].

AD 276 ADANSON, Michel *Sur un mouvement particulier découvert dans une plante appelée Tremella.*
4 pp. 24 Mars 1767. 22.5 × 35 cm

The manuscript of his paper read at the Académie and published in its *Mémoires* 1767: 564–572, plate 19. 1770. Adanson's abstract was published in *L'Avant-coureur* 6 Avril 1767: 215–218. [cf. AD 206].

AD 277 ADANSON, Michel *Discours ou examen ... sur la question y a-t-il entre les trois regnes animal, végétal et minéral des limites sensibles et distinctes: ou ces trois regnes se lient ils les uns aux autres par une chaine continue qui enfasse une unité réelle?*
3 pp. 1768. 23 × 35 cm

The beginning of a paper to have been submitted for a prize proposed for 1770 by the *Académie des Sciences, Belles-Lettres & Arts de Rouen* as was announced in a clipping from *L'Avant-coureur* (10 Oct. 1768) preserved with this manuscript.

AD 278 ADANSON, Michel *Ouvrages à faire en histoire naturelle*
10 pp. 23 × 35, 9 pp. 5.5 × 8.5 cm [ca.1768, in paper cover.]

An extensive list of publications planned by Adanson with many details on content, size, publisher, and estimated cost. A later list of titles with another numbering sequence is included.

AD 279 ADANSON, Michel *Sur le sexe considéré dans les plantes et les animaux*
1 leaf. [ca.1768, paper cover.] 11.5 × 19 cm

The beginning of a *Mémoire* for the Académie, treating some terms only.

AD 280 ADANSON, Michel *Système de botanique le plus facil qui se puisse [faire] fondé sur la considération de la situation des ovaires*
7 pp. [ca.1768.] 10.5 × 17.5 cm

A draft of a paper to be read at the Académie, but never submitted, elaborating one of the many *systèmes* discussed in his *Familles des plantes*. The cover paper suggests the 1768 date.

AD 281 ADANSON, Michel *Histoire générale des animaux*
2 pp. [ca.1768.] 22.5 × 35.5 cm

The incomplete introduction for a general work on animals. The paper cover is of the 1768 series of manuscripts.

AD 282 ADANSON, Michel *Cours d'histoire naturelle. Zoologie*
772 pp. 1772. 17 × 22 cm

The manuscript for the first part of these three seasons of lectures (cf. Nicolas p. 65) beginning, respectively, 30 January 1772, 17 December 1772, and 25 February 1774. It consists of 20 clearly written *séances*, each in a paper folder of the same size, gathered in a board folder. Originally the broadsheet poster for the courses [AD 7] was filed here. This manuscript was published in 1845 [cf. AD 9].

AD 283 ADANSON, Michel *Cours d'histoire naturelle. Règne végétal*
143 pp. 1773. 17 × 22 cm

The manuscript of the botanical part of Adanson's course, covering material presented from the 21st through the 26th *séances*.

AD 284 ADANSON, Michel *Cours d'histoire naturelle. Règne minéral*
328 pp. 1772–1774. 17 × 22 cm

The manuscript of the mineralogical part of Adanson's course, comprising the material of the 27th to 36th *séances*, plus that for the 37th—a recapitulation of the whole course and an analysis of the differences between the three natural kingdoms; probably rearranged from original.

AD 285 ADANSON, Michel *Cours d'histoire naturelle à la campagne*
19 pp. 10 × 16 cm, 33 pp. 1773. 17 × 22 cm

A manuscript for a field course in natural history by Adanson, beginning 13 May 1773. An introduction summarizes the history of the *herborisations* in the environs of Paris, from the period of Tournefort (ca.1690) to that of Bernard de Jussieu. There follows a list of the trips Adanson plans with places to be visited, and some crude maps, plus selected list of plants to be seen.

AD 286 ADANSON, Michel *Sur l'Acacia des anciens, et sur quelques autres arbres du Sénégal qui portent le gomme rougeatre appelée communément gomme arabique*
9 pp. 1773. 18 × 25 cm

The manuscript of Adanson's first *Mémoire* on *Acacia* for the Académie, read 24 February 1773 and printed in the *Mém. Acad. Sci.* 1773: 1–17. 1777.

AD 287 ADANSON, Michel *Sur le gommier blanc appelé Uérek au Sénégal; sur la manière dont on en fait la récolte de sa gomme et de celle des Acacia et sur un autre arbre du même genre*
9 pp. 1773. 18.5 × 25 cm

The manuscript of Adanson's second *Mémoire* on *Acacia* for the Académie, read 11 July 1773.

AD 288 ADANSON, Michel *Plan d'un ouvrage universel d'histoire naturelle en gravures en folio*
20 pp. 1774. 18 × 25 cm

A collection of drafts of six papers soliciting subscriptions to Adanson's proposed *Encyclopédie universelle*, to contain illustrations of all the plants, animals, and minerals of the world. All are dated in 1774. One is addressed to Prince Pignatelli, one to M. Bertin to be given to Madame la C[omtesse] du Barry with permission to present it to the king, two were for an advertisement or prospectus without evidence of having been printed. Another, is dated 1772, but the wording of many parts is that of those dated 1774. The last went to M. le Chevalier Daugny for M. Beaujon [Nicolas] (1718–1786) and M. Le Cardinal de Luynes [Paul d'Albert] (1703–1788).

AD 289 ADANSON, Michel *Infusions*
14 pp. 1774–1775–1776. 11.5 × 17.5 cm

Records of Adanson's observations, with marginal sketches, on infusions with different substrata, infusoria, and cristals, and concerned mostly with the presence or absence of movement.

AD 290 ADANSON, Michel *Expériences sur la Tremella et les Conferves*
16 pp. 1775–1776. 11.5 × 17 cm

Data on experiments with Algae. Filed originally with AD 291.

AD 291 ADANSON, Michel *Nouvelles expériences sur la reproduction, sur le mouvement oscillatoire, et sur quelques autres qualités et propriétés de la plante appelée Tremella*
4 pp. [1775–1776.] 18.5 × 24.5 cm

An unfinished paper for the Académie on the properties of Algae, of which an earlier draft was written on the same leaf with a copy of a letter to Bonaventure Corti dated 10 July 1775. It contains Adanson's opinion that "revival" of the *Tremella* is not a "revivification" but a germination from detached parts, comparable to that from seeds.

AD 292 ADANSON, Michel *Plan et tableau de mes ouvrages manuscrits et en figures, depuis l'année 1741 jusqu'en 1775, distribuées suivant ma méthode naturelle découverte au Sénégal en 1749*
31 pp. 1775. 18.5 × 24.5 cm

The first and the final drafts of the paper read at the Académie 15 February 1775 on Adanson's large plans for a universal encyclopedia [for publication cf. AD 8]. The rough draft contains details omitted from the final draft, such as Adanson's definition of *système* vs. *méthode*.

AD 293 ADANSON, Michel *Articles d'histoire naturelle*
120, 3, 2 pp. [1776.] 19 × 23–25 cm

The manuscript of most of Adanson's contributions to the *Supplément* of Diderot's *Encyclopédie*. A few entries in the alphabetical sequence Aal–Cornuto are not represented in the *Encyclopédie* by Adanson's contribution.

AD 294 ADANSON, Michel [*Compte rendu*] *des droits de Sonnerat pour prétendre titre de correspondant [de l'Académie]*
3 pp. [ca.1776.] [last leaf partly torn.] 12 × 18 cm

A manuscript documenting Sonnerat's eligibility as a *Correspondant de l'Académie*; prepared at the Académie's request, and summarizing Sonnerat's accomplishments.

AD 295 ADANSON, Michel *Catalogues des pays*
1 p. 1777–1779. 11 × 17 cm

This contains: *Observations à faire en Sicile* given to the Prince Pinatelli in August 1777. Items AD 163, 207, 300, and 365 were originally filed with this one.

AD 296 ADANSON, Michel *Remarques d'histoire naturelle sur un mémoire et un herbier de M. Sonnerat*
8 pp. 1777. 18.5 × 24.5 cm, 2 pp. 11 × 17.5 cm, 4 slips 6.5 × 12 cm

A manuscript, with the rough draft and some plant lists on Sonnerat, read to the Académie on 19 and 22 November 1777; not published, “non admis” fide Adanson notation.

AD 297 ADANSON, Michel *Loix naturelles*
12 pp. [ca.1779.] 11 × 17 cm + 2 smaller slips.

In the majority of the pages the word *Prèface* follows the title. The primary question treated is *Existe-t'il un ordre naturel entre les Etres qui composent l'Univers?* Two leaves show offsets of color plates, identifying them as guard-leaves from a copy of Knoop, *Fructologie*.

AD 298 ADANSON, Michel *Méthode de M. de Lamarck*
27 pp. + newspaper clipping in paper cover. 1779. 11 × 17 cm

A manuscript of a critique of Lamarck's *Flore Française*, of which a report by the *commissaires* at the Académie was read 6 February 1779. Much or all of this very critical manuscript was written by Adanson within a week of the session. Yet the book as a whole (especially the *Approbation*) could not have been ready at that time; the accompanying clipping, dated 28 Mars 1779, states that Lamarck presented a copy to the king and queen on 21 March.

AD 299 ADANSON, Michel *Plan de descriptions et de figures completes d'un considérablement ... nombre nouvellement découverts et de quelques en particulier qui n'avoient observés avec parfait d'exactitude*
10 pp. [ca.1779.] 17 × 22 cm

An unfinished manuscript of a paper to be read at the Académie, including a long Latin description of mangrove (*Rhizophora* Linn.). The paper's watermark is dated 1777.

AD 300 ADANSON, Michel *Plantes observées autour d'Aix*
2 pp. 1779. 11 × 17 cm

A list of plants observed by Adanson in the neighborhood of Aix-en-Provence, especially on Mont Saint-Victoire, 18–23 August 1779.

AD 301 ADANSON, Michel [*Rapport*] *sur un mémoire intitulée: Observations sur les parties organiques des champignons, et leur manière de se reproduire, par M. Palisot de Beauvois*
4 pp. [ca.1780.] 18.5 × 25 cm

Manuscript for a report to the Académie on behalf of “nous commissaires,” but without evidence of later presentation.

AD 302 ADANSON, Michel *Catalogue des plantes au nombre de 1542 conservées dans des bocaux à liqueur au Cabinet de l'Académie roiale des sciences—rangées suivant la méthode naturelle des familles des plantes ... en 1781 à 1783. Plus animaux depuis le No. 1600 jus-qu' à 1709*
107 pp. 1781–1783. 12 × 18 cm

A green covered notebook comprising his list of plants and animals, numbered consecutively, of a collection preserved in the cabinet of the Académie, and of which no other record is known to us. Adanson added dates after many of the names, presumably those of their collection, and which range from 1736 to 1748, but mainly 1746 to 1747.

AD 303 ADANSON, Michel *Remarques sur les 4 familles ... de M. Palissot [sic] de Beauvois ...*
2 pp. [1783.] 10.5 × 16.5 cm

A summary and criticism of a paper by Palisot de Beauvois on cryptogams prepared for the Académie.

AD 304 ADANSON, Michel *Académie universelle encyclopédique*
19 pp. [ca.1789–1790.] 11 × 17 cm

Manuscripts comprising Adanson's ideas of and projects for a universal academy and its functions, including brief indications of proposals Adanson received from Spain, Louvain, and Russia and in response to which he sent similar plans.

AD 305 ADANSON, Michel *Epokes de sa vie*
1 p. 1789–1790. 11 × 16.5 cm

A list of the important events in Adanson's life for the period of 1772 to 1789 with one note for 1 January 1790. The first page, accounting for the earlier period, is missing.

The manuscripts that comprise the group AD 306 to AD 331 inclusive are written only by Adanson, are either undated or comprise a mélange of mixed dates, and are presented in alphabetic sequence of title.

AD 306 ADANSON, Michel *Accroissement végétal*
108 pp. 11 × 16.5 cm

A collection of notes and newspaper clippings on growth, especially data from Adanson's experiments with wheat.

AD 307 ADANSON, Michel [*Agriculture*]
83 pp. 11 × 16.5 cm

Manuscript notes and newspaper clippings on various agricultural subjects, gathered under such headings as: *défrichemens* (cleaning), *engrais* (manuring), *labours* (plowing), *moisson* (harvesting).

AD 308 ADANSON, Michel *Arbres; Bois; Forêts; Taille des arbres*
133 pp. 11 × 17.5 cm

A collection of notes and clippings concerning trees, forests, and timber.

AD 309 ADANSON, Michel [*Bleds*]
425 pp. 11 × 17 cm

A collection of notes, observations, and results of Adanson's cereal experiments in the 1760's, including some copies of his requests for seeds, etc. Special sections include culture, varietal distinctions, germination, ergot, and cereal products.

AD 310 ADANSON, Michel *Catalogue alfabetike des maladies les plus ordinaires des gens de la campagne et des simples ou plantes qui croissent autour d'eux pour les guérir et les nourrir*
37 pp. 11 × 17 cm

A manuscript on medical botany for the layman, with the properties of 16 plant species.

AD 311 ADANSON, Michel *Catalogue des plantes; herborisations; Paris*
5 pp. 11 × 17 cm

Lists (in a paper cover) of the plants found in the environs of Paris, especially of Fontainebleau and Meudon, including a leaf listing, with prices, the food required for a lunch for 20 persons on a trip. Two short lists in the hand of B. de Jussieu are removed [cf. AD 363].

AD 312 ADANSON, Michel *Contradictions de Linné*
49 pp. 11 × 17 cm

Adanson's collection of his criticisms on specific points in Linnaeus' works, some of minor importance. In a paper cover.

AD 313 ADANSON, Michel *Discours sur la manière d'étudier l'histoire naturelle*
5 pp. 17 × 22 cm

A manuscript intended as an introduction for his *Dictionnaire de botanique*, containing criticisms of Linnaeus, and Adanson's opinions on the correct *méthode* for botany.

AD 314 ADANSON, Michel *Discours sur l'utilité de l'histoire naturelle*
12 pp. 19 × 23 cm + 4 smaller leaves.

Noted by Adanson as the preface for his *Dictionnaire universelle d'histoire naturelle*; describes briefly the economic importance of natural history of a dictionary of this branch of science. The requirements of adequate phytophraphy are set forth.

AD 315 ADANSON, Michel *Éclaircissement sur la methode naturelle de M. de Jussieu*
39 pp. 11 × 17.5 cm

A manuscript of Adanson's opinions on Bernard de Jussieu's system of classification with a justification for his own *méthode naturelle*. In it, Adanson defends his claim for priority for his ideas. Notes that M. Coindet could certify that the answer to a question by J.-J. Rousseau and erroneously credited to de Jussieu was provided by Adanson [cf. AD 132].

AD 316 ADANSON, Michel *Filatures. Coton*
17 pp. 5.5 × 2.25, 11 × 17 cm

A manuscript mainly on cotton: the species, origin, culture, flowers, and qualities. Includes seven samples of cotton fibers.

AD 317 ADANSON, Michel *Fruits*
391 pp. 11 × 17 cm

A collection of manuscripts on fruits and fruit trees. In addition to general topics, treatments of individual *fraisiers* (strawberry), *maronnier* (chestnut), *oranger*, *melons*, *pêchers* (peach), *poiriers* (pear), and *pommiers* (apple). A few of the Deschizeaux-type leaves are present (cf. p. 268), together with a few newspaper clippings. In the *poirier* collection a drawing by Adanson illustrating a monstrosity is included.

AD 318 ADANSON, Michel *Gelées; ses effets sur les végétaux*
5pp. 11.5 × 17.5 cm

A manuscript containing Adanson's opinions on the effects of frost on plants.

AD 319 ADANSON, Michel *Graminum divisio Adansoniana*
6 pp. 19 × 24 cm

A tabulated classification of the grasses, written either during the latter part of his work in Senegal or after his return to France.

AD 320 ADANSON, Michel *Jardinage, traité méthodiquement*
74 pp. 21 × 32 cm

A manuscript of a general treatise on gardening practices, noted by Adanson to have been based on the earlier writings of abbé Pluche and *Sieur* [Louis] Liger and others, referring possibly to *Spectacle de la nature* by Antoine-Nicolas Pluche (1736–1751), and one or more of the several horticultural works of Louis Liger (1658–1717), whose last was published in 1743. This is an early Adanson manuscript, probably before his *voyage* to Senegal or early in his Senegal period. Its cover bears the number “49,” added later, of his large series of planned publications.

AD 321 ADANSON, Michel *Jardinage*
225 pp. 11 × 17 cm

A collection of gardening notes, especially of work to be done each month of the year, of reports of experiment in Adanson's gardens for many years, and of articles for his treatment of greenhouses in his *Familles des plantes*, including a mathematical table in Andriot's handwriting, parts of which were used in Adanson's tables on pp. 130 and 131 of his *Familles*.

AD 322 ADANSON, Michel *Livres et figures à acheter*

8 pp. 11 × 17 cm

A collection of annotated references primarily of illustrated books on natural history which Adanson wanted, with an indication of prices.

AD 323 ADANSON, Michel *Memoire sur les monstruosités dans les plantes et sur les moyens d'avoir des fleurs doubles*

1 p. [written on the back of a playing card, in a paper cover]. 5.5 × 9 cm

A note of an experiment to be made to produce double flowers. The cover's inscription indicates that Adanson planned to prepare a *Mémoire* for the Académie on monstrosities among plants. Béguillet's letter [AD 161] was originally filed here.

AD 324 ADANSON, Michel *Observations sur une monstruosité de l'orge sucrion à graines avec ovaires embryons doubles et éclaircissement à ce sujet sur ce qu'on doit appeler cotyledons dans certaines plantes graminées*

1 p. with drawings 17.5 × 22.5 cm, 2 pp. of text 22.5 × 35 cm, and 2 herbarium specimens + 2 smaller leaves.

An incomplete manuscript with drawings, grain specimens (barley) and two specimens of seedlings; prepared as a *Mémoire* for the Académie (never submitted).

AD 325 ADANSON, Michel *Nouveau spectacle de la nature*

4 pp. 17.5 × 22.5 cm

The preface in a book whose title was adapted from Pluche's *Spectacle de la Nature* [cf. AD 320], in which Adanson criticizes Pluche and provides an outline of his projected book.

AD 326 ADANSON, Michel *Physiologia sive historia naturalis*

4 pp. [on strips] 11 × 26.5 cm

A Latin manuscript of natural history definitions and primary subdivisions. Page 3, dated 18 Apr. 1750, describes his microscopic observations on blood, with two small sketches and a count of the number of blood cells.

AD 327 ADANSON, Michel *Plan[s] [des jardins]*

56 pp. 11 × 17, 19 × 25, 10 × 16, 12 × 19, and 12 × 22.5 cm

A collection of plans and notes of various gardens, including some clippings.

AD 328 ADANSON, Michel *Plantae*

44 pp. 18 × 24 cm + some narrow strips

A tabulation, mostly in Latin, of plant genera (more or less in the Tournefortian system) with family names added later.

AD 329 ADANSON, Michel *Plantes medicinales à avoir ex Mat[eria] Med[ica] Lin[naei]*
2 pp. 18.5 × 23 cm

A list of desiderata of 535 medicinal plants described in Linnaeus' *Materia medica* (1749).

AD 330 ADANSON, Michel [*Plantes du Sénégal*]
212 pp. 11 × 17 cm. Includes some clippings.

Entries extracted from his *Dictionnaire de botanique* [AD 333], concerning plant names and their synonyms to which are added data on his Senegal collections, usually as a collection number.

AD 331 ADANSON, Michel *Vins. Vignes. Liqueurs*
142 pp. Ca.11 × 18 cm, 10 pp. ca.19 × 24 cm including many clippings.

A collection of notes and clippings about wine, grapes, and beverages. Some leaves are in handwritings other than Adanson's.

AD 332 ADANSON, Michel & DAUBENTON [Jean-Louis-Marie] (1716–1800) [*Rapport des commissaires de l'Académie sur un mémoire intitulé: Discours sur les orties marines ou les anemones de mer par M. Vastel doct. ... de la société académique de Cherbourg ...*]
2 pp. 11 × 17 cm

Adanson's report on a paper submitted to the Académie.

AD 333 ADANSON, Michel [& DESCHIZEAUX, P.] [*Dictionnaire de botanique*]
Ca.12,000 pp. Ca.11 × 17 cm now arranged in nine Solander boxes.

This is Adanson's collection of data on plants, arranged by generic or common name, similar to a modern card file. The entries are alphabetical by plant name and provide the synonymy, sometimes descriptions, and often some printed figures of the plant concerned. The majority of the slips are the Deschizeaux-type of handwriting and are of data extracted from earlier works. Many entries include also clippings, mostly from Bauhin, *Pinax theatri botanici* (1623, or the 2nd ed. 1671). The figures pasted on the slips are from N. Lémery (1645–1715), *Dictionnaire ou traité universel des drogues simples* (Paris, ed. of 1689 or 1714). Another set of plates, folded to the size of the slips, is of unidentified origin. Adanson wrote a new generic name on a considerable number of the slips and added in his hand others with similar data. Some of the entries originally included here are now identified by separate numbers in this inventory. For dates of Deschizeaux cf. AD 355.

AD 334 ADANSON, Michel & FOUGEROUX [DE BONDARROY, Auguste-Denis] (1732–1789) [*Rapport des commissaires nommés par l'Académie pour lire et examiner un mémoire de M. Antoine Laurent de Jussieu ... intitulé Examen de la famille des Renoncules*]
10 pp. 1773. 17 × 22 cm

Comprises the first and second draft of a report by Adanson, to be countersigned by Fougeroux, on the paper of A.-L. de Jussieu and the later “*Mémoire pour servir de rapport à celui qui a été lu à l’académie le 13 fevrier 1773.*” These three memoires, actually written by Adanson, belong together. The first two may represent drafts written before and after his discussions with Fougeroux. For example, Adanson’s reluctance to judge the paper of A.-L. de Jussieu, with what he is so involved is omitted from the second draft. It appears in the beginning of the third mémoire, where the priority of his own ideas is stated. In this paper Adanson states that he yielded to pressure to serve as a *commissaire* for A.-L. de Jussieu’s paper by the *voeu* of the Académie and the *prières* of his friend, Bernard de Jussieu.

AD 335 ADANSON, Michel & FOUGEROUX [DE BONDARROY, Auguste-Denis] [*Rapport des commissaires nommés par l’Académie pour lire et examiner*] un *Mémoire de M. Descemet ... intitulé: Nouvelles découvertes sur la structure des organes de la génération de différentes espèces d’Apocins de Periploca et d’Asclepias de Tournefort, et sur la manière dont se fait l’acte de génération dans ces fleurs*
9 pp. 11 × 17, 1779. 17 × 22 cm

Comprises Adanson’s first and second draft of a report for the Académie, for which Fougeroux was *commissaire* also, but without any indication that the original was signed by the latter. Annotated: “Fait au Louvre ce Fevrier 1779.” The second draft has some deletions.

AD 336 ADANSON, Michel & FOUGEROUX [DE BONDARROY, Auguste-Denis] [*Rapport des commissaires nommés par l’Académie pour lire et examiner*] l’*extrait d’un Mém[oire] de M. Descemet ... sur la fleur de Periploca foliis obl[ongis] s[eu] Periploca graeca Lin[naeus] Sp[ecies plantarum] 309*
1 p. 1779. 11 × 17.5 cm

A first draft in Adanson’s hand of a report on an abstract of a paper by Descemet; the date of its presentation to the Académie is not given.

AD 337 ADANSON, Michel & FOUGEROUX DE BONDARROY, [Auguste-Denis] *Rapport [sur] le 3^d. Mémoire lu à sur les plantes de la famille des Apocins par M. Descemet ...*
2 pp. text, 2 pp. sketches. 1779. 10 × 15, 12 × 18 cm

A first draft in Adanson’s hand of a report on a third paper by Descemet; date: “ce ___ Avril 1779.”

AD 338 ADANSON, Michel & FOUGEROUX [DE BONDARROY, Auguste-Denis] *Raport [sic] [des] commissaires nommés par l’Acad[émie pour lire] un mém[oire] de M. Desfontaines sur un nouveau genre de plante corymbifère de la famille des Composées*
1 p. n.d. 11 × 17 cm

Adanson’s first draft of a *Mémoire* on a new genus; Adanson proposed a new Latin name for this genus in honor of Desfontaines. Dated “Fait au Louvre ce ___–1779.”

AD 339 ADANSON, Michel & FOUGEROUX [DE BONDARROY, Auguste-Denis] [*Rapport des commissaires nommés par l'Académie pour lire*] un *Mémoire de M. Vastel ... intitulé, Expériences et observations nouvelles sur la germination faites à Cherbourg en 1779*
1 p. 1780. 11 × 17 cm

Adanson's first draft of a report on Vastel's paper describing experiments with seedlings from which different parts were removed. Dated: "Lû à l'Académie le ___Fevrier 1780."

AD 340 ADANSON, Michel & JUSSIEU, [Bernard] de [*Rapport des commissaires*] nommés par l'Académie pour l'examen de la question suivante, proposée par la Société des Arts de Londres, savoir "s'il croit en France pendant les mois de Decembre, Janvier, Fevrier, Mars et Avril, quelqu' espèce d'herbe ou chiendent suffisant de toute sorte de bétail; que la raison et l'analogie persuadent que le Père commun de tout n'a pas laissé la conservation de ces animaux uniquement aux soins de l'homme, pour le nourrir pendant cette saison avec de fourrage sec seulement, et que ces mêmes herbes leur out été données pour qu'ils pussent s'en nourrir alors eux mêmes et vivre au moines dans un état suportable ..."
2 pp. 1760. 18 × 24.5 cm

Adanson's draft of a report concerning the question raised by P. Templeman in his letter of 29 July 1760 [cf. AD 242] in the format regularly used for the printer's copy. Annotated: "Lu à l'Acad[émie] en Aout 1760."

AD 341 ADANSON, Michel & JUSSIEU, [Bernard] de [*Rapport des commissaires nommés par l'Académie pour examiner*] un ouvrage de M. Duhamel qui a pour titre *Traité de la garance et de sa culture brochure in 12 de 131 pajes avec 4 planches*
2 pp. 1765. 15.5 × 22 cm

Adanson's first draft of a report on Duhamel du Monceau's book on madder [cf. AD 52]. Read at the Académie: 27 July 1765.

AD 342 ADANSON, Michel & JUSSIEU, [Bernard] de [*Rapport des commissaires nommés par l'Académie pour lire*] une lettre de M. Linneus [sic] du 3 Aout de cette année dans laquelle il annonce avoir observé un mouvement très étonnant dans la plante qu'il apelle *Marchantia polymorpha*, ...
7 pp. 1767. 18 × 22 cm

Adanson's draft of a report on a Linnaean letter concerning movement in *Marchantia*, allegedly discovered by Linnaeus. In this report Adanson cited M. Marchant *filis*' earlier description of the same phenomenon (in *Mém. Acad. Sci.* 1713, p. 230). Moreover B. de Jussieu reported to the Académie that he observed this movement not only in *Marchantia*, but in *Jungermannia* and *Anthoceros*. A transcription of Linnaeus' letter is added, as are quotations from the cited periodicals. The report was read to the Académie on 25 November 1767.

AD 343 ADANSON, Michel & JUSSIEU, [Bernard] de [*Rapport des commissaires nommés par l'Académie pour lire*] les déclaration et procès verbaux et examin[er] les feuilles et fruits de géoflier et des muscadiers accompagnées d'une lettre [en date du 16 Juillet 1772] par laquelle

M. Poivre intendant des îles de France et de Bourbon demande à l'Académie son jugement pour constater la vérité de sa découverte de ces deux Epiceries fines, et pour rendre authentique la plantation qu'il en a fait faire aux îles de France et de Bourbon, et à celles de Seichelles
4 pp. 1773. Ca.19 × 23 cm + 1 small leaf.

Adanson's draft of a report on documentation of the introduction of clove and nutmeg to the East African islands from the Moluccas. The documents were deposited at the Académie; the specimens were described by Adanson as identical with others from Banda. Read at the Académie on 17 February 1773.

AD 344 ADANSON, Michel & JUSSIEU, [Bernard, and Antoine-Laurent] de [*Rapport des commissaires pour lire différentes sections*] du traité des pêches de M. Duhamel
14 pp. 1775–1790. 12 × 18 cm

Adanson's drafts of reports on portions of Duhamel's work on fish and fishing. The first two reports, dated 9 Dec. 1775 and 30 Aug. 1777, cite Bernard de Jussieu, as collaborating *commissaire*, and the last, dated only 1778, cites Antoine-Laurent de Jussieu. Notes concerning fishes have been added, including two pages with a drawing of a West African fish, translated by Adanson from a note in Spanish of Audibert-Caille, received in January 1790.

AD 345 ADANSON, Michel & MORAND, [Sauveur François] (1697–1773) [*Rapport des commissaires nommés par l'Académie pour lire*] *Des observations sur des végétations extraordinaires par M. Marcorelle correspondant de l'Académie*
2 pp. 1771. 18 × 25 cm

Draft of a report in Adanson's hand on a paper containing the account of six different observations on plant growth, of which early growth of grapes is discussed amply by Adanson. Read at the Académie: 26 June 1777.

AD 346 [BARRELIER, Jacques] (1606–1673) *Plantes d'Espagne et Portugal rangées suivant le système de Tournefort*
108 pp. n.d. 18 × 25 cm [Bound in vellum, numbered "No. 5."]

The title given is written on the cover in Adanson's hand; the first page has the Latin title: "Plantes hisp. et Lusit. ordin. methodicis ex R. Syll. Clus. Et Tournefortio." The handwriting of this list of Latin names of plants resembles closely that ascribed to Deschizeaux. Nevertheless the binding, similar to that of AD 348, bearing "No. 4," suggests Barrelier as the writer.

AD 347 [BARRELIER, Jacques] *Plantes en langue Espagnole en 2 ordres*
38 pp. n.d. 15 × 21 cm

A manuscript in the same hand as are AD 346 and 348, consisting of two parts: *Table des noms Espagnols et latins extraite de Matteole par Laguna* [Andrés] (1494–1560) *ordre alphab.* (25 pp.) and *Table des noms Espagnols des plantes tirés de Laguna, par ordre méthodique*. The Italian watermark, from Genoa, added evidence for crediting this to Barrelier, since Italian-made paper was used in Spain.

AD 348 [BARRELIER, Jacques] *Plantes suivant l'ordre de ses voyages de Paris en Espagne aux Alpes et en Suisse*

168 pp. 15.5 × 21.5 cm [Bound in vellum with scars of an earlier burning], numbered “No. 4.”
n.d.

A list of plants from the different parts of Barrelier's *voyage*, possibly written by himself. A part of a leaf printed in Spanish is used to reinforce the spine; possibly written by Barrelier during his *voyage*. The manuscripts of Barrelier are known to have been saved from a fire; the scars here suggest that this document was a part of that collection. Nevertheless the original handwriting of Barrelier should be compared with that of this list. An annotation, probably in Adanson's hand, on the cover reads: “Excellent.”

AD 349 BAUHIN, Johann (1541–1613) *Synonyma J. Bauhini Tournefortionis appropriata*
212 pp. 1725. 21 × 27 cm [in vellum cover]. [correct placement of the vellum statement?]

A manuscript of the Deschizeaux type, marked: “a me excerpta Jan. et Febr. 1725.” in a cover used earlier for Dalechamps' *Synonyms* [AD 355], and bearing both titles in the same hand.

AD 350 B[ÉGUILLET, Edme] (ca.1720–1786) *Moyens de se procurer des fleurs doubles*
4 pp. n.d. 25 × 37 cm

A manuscript headed, under the calligraphic title, “Extraits de l'anthologie ou discours sur la nature et le sexe des fleurs. Par M. B ... de l'institut de Bologne des Academies de Florence, Montpellier, &c ... ,” concerning double flowers. Author's surname noted by Adanson.

AD 351 BONT, Jacob de (1592–1631) *Plantae ex Java*
5 pp. 16 × 21 cm

A manuscript of the Deschizeaux-type with a condensed list of the plants in Bont (1658).

AD 352 CLUSIUS, [Charles de l'Escluse] (1525–1609) *Synonima Clus. Hisp. quo ad icones*
16 pp. n.d. 15.5 × 21 cm

A Deschizeaux-type manuscript with lists of plants from Clusius' *Rariorum aliquot stirpium per Hispanias obs ***historia* (1576).

AD 353 COMMELIN, [Kaspar] (1668–1731) *Rariores et exoticae plantae. Rariorum plantarum in praeludiis botanicis recensitarum descriptiones*
6 pp. 17.5 × 23 cm

A Deschizeaux-type manuscript with lists of plants from two books by Commelin, published in Leiden (1715).

AD 354 DALECHAMPS, Jacques (1513–1588) *Lugdunensis historiae synonyma ordine methodico*

50, 4 pp. Ca.17–18 × 21.5–23 cm

A Deschizeaux-type manuscript with lists of plants from Dalechamps, *Historia generalis plantarum* (1578 edition?) arranged according to Tournefort's system of classification.

AD 355 [DESCHIZEAUX, Pierre] (1687–ca.1735?) *Plantes des environs de Saint-Petersbourg*
12 pp. 1724. Ca.14.5 × 18 cm

A Deschizeaux-type manuscript, probably by Deschizeaux, in connection with his *voyages* to St. Petersburg. Consists of a list of plant names with a Latin title. Preserved in a board cover, in which Adanson originally filed a number of manuscripts of the Deschizeaux type. The date of death of Deschizeaux, often cited as 1730, is incorrect, being shortened from circa 1730. The date of 1735 needs confirmation.

AD 356 [DESCHIZEAUX, Pierre] *Catalogue des plantes démontrés au jardin roial depuis 1728 jusqu'en 1733 avec des additions. Hortus regius parisiensis*
192, 35, 7, 15 pp. Ca.17–18 × 22 cm [Bound in board cover.]

A Deschizeaux-type manuscript containing lists of plant names from the Jardin du Roi, Paris.

AD 357 DONATI, [Vitaliano] (1713–1763) *Plantes marines, leur division*
3 pp. 11 × 17 cm

An abstract in Adanson's hand of a classification of marine organisms probably from Donati's *Essai sur l'histoire naturelle de la Mer Adriatique ...* 1758, pp. 21–26.

AD 358 GLEDITSCH, [Johann Gottlieb] (1714–1786) *Systema gleditschianum*
15 pp. Ca.16 × 20.5 cm

An abstract in Adanson's hand of a classification by Gleditsch, published in *Histoire de l'Académie royale des Sciences de Berlin* 1749, p. 109 et seq.

AD 359 GRAND-JEAN DE FOUCHY, Jean-Paul *Extrait des registres de l'Académie Royale des Sciences du 4 Decembre 1756*
1 p. 1756. 18.5 × 25 cm

The original certificate of the approbation of the Académie for Adanson's *Histoire du Sénégal* [AD 4].

AD 360 GRAND-JEAN DE FOUCHY, Jean-Paul *Extrait des registres de l'Acad[émie] Royale des Sciences du 4 Mars 1775*
1 p. 9 March 1775. Ca.16.5 × 21 cm

An unpublished certificate concerning Adanson's plan for an Encyclopédie, read at the Académie in 1775. The committee nominated to study Adanson's manuscripts considered the plan desirable and recognized the usefulness of such an encyclopedia of natural history. Reports

that Adanson is advised to begin to publish the account of his *voyages*, for which government support is invited.

AD 361 JUSSIEU L'AINÉ, [Antoine] de (1686–1785) *Herborisations du bois de Boulogne*
7 pp. n.d. 17 × 22–23 cm

A list of plants of the Paris region in the hand of the Deschizeaux-type mss.

AD 362 JUSSIEU L'AINÉ, [Antoine] de *Herborisation de Saint-Prix*
7 pp. n.d. Ca.11 × 18 cm

Another list of plants of the Paris region in the hand of the Deschizeaux-type mss.

AD 363 [JUSSIEU, Bernard de] [*Herborisation*]
3 pp. n.d. Ca.9 × 12–15 cm

Some undated and unsigned lists of plants of different places in the Paris region in Bernard de Jussieu's hand. Originally filed by Adanson with his note on the herborisations of the Paris region.

AD 364 JUSSIEU, [Bernard] de & ADANSON, Michel [*Rapport des commissaires nommés par l'Académie pour lire un mémoire de M.] Renard ... intitulé Prospectus d'une méthode [facile pour] apprendre la botanique sans maître ...*
3 pp. 1769. 22 × 35 cm

Adanson's draft of a report on Renard's paper that compares the systems of Tournefort and Linnaeus. A large part of Adanson's criticism of the author was suppressed. This is one of two reports in which Adanson is given as the junior author. It was read at the Académie on 1 February 1769.

AD 365 JUSSIEU, [Bernard] de & ADANSON, Michel [*Rapport des commissaires nommés par l'Académie pour lire] un mémoire de M. de Linné sur le genre de Plante qu'il appelle Cycas ...*
3 pp. 1770. 19 × 23 cm

Adanson's rough draft of a report on a paper of Linnaeus, read at the Académie on 13 June 1770.

AD 366 LETONCLEUR,____, [*Contract for hiring a coach for a voyage from Paris to Chaumont en Bassigny for 8 days*]
1 p. 3 March 1767. Ca.17 × 22 cm

A document, written by the owner, signed by Adanson, describing the carriage and terms for its hire [cf. AD 143, 144].

AD 367 MARCORELLE,____, *Mémoire sur le Salicor*
12 pp. [1766.] Ca.20 × 30 cm

A revised manuscript of a paper on the properties and the culture of *Salsola soda* L. and the preparation of potash from it [cf. AD 215, 216]. Filed with it is Adanson's draft of an abstract of an earlier paper and a list of the points to be revised.

AD 368 OELHAFIUS, Nicolaus (d. prior to 1656) *Plante sponte nascentes circa Dantiscum boruscorum*
18 pp. n.d. Ca.17 × 21 cm

An alphabetical list of the Deschizeaux-type mss. of plant names from Danzig, abstracted from Oelhafius' [misspelled Olhasius in this mss.] *Elenchus plantarum circa ... Dantiscum sua sponte nascentium* ... 2nd ed. 1656; the manuscript cites date as 1657.

AD 369 ORTA, Garcia da (ca.1500–1570) and MONARDES, Nicolas (1493–1588) [*Due libri dell' historia dei semplici dall' Indie orientali* (by da Orta); *Due altri libri dall' Indie occidentali* (by Monardes)]
21 pp. 14 × 19 cm

A Deschizeaux-type mss. of plant names, citing only the chapter headings and the authors' names.

AD 370 *Plantae Lusitanicae. Catalogue de plantes du Portugal*
4 pp. Ca.16 × 21 cm

A Deschizeaux-type manuscript of a list of Latin names of Portuguese plants; probably an abstract.

AD 371 [*Plantes de Martinique. Plantes de*] *Guadeloupe*
4 pp. [Martinique], 4 pp. [probably Martinique], 72 pp. Guadeloupe. 19–20 × 24–28 cm

A Deschizeaux-type mss., defective, especially at margins, and incomplete. Written or copied from another mss. by some Guadeloupean who botanized also on Martinique, giving polynomials for the plants and references to exact localities. A reference to Bernard de Jussieu's opinion is included. Last date found in it is 1730.

AD 372 *Plantes du botanicum parisiensis ...*
22 pp. n.d. Ca.19 × 23 cm

A Deschizeaux-type mss. of an alphabetic list of polynomials of plants of the Paris region.

AD 373 PLUMIER, Charles (1646–1704) *Nova genera*
52 pp. [in gray paper cover.] 19 × 20 cm

A Deschizeaux-type mss. of names of new genera in Plumier's *Nova plantarum Americanarum genera* (1703).

AD 374 PLUMIER, Charles *Index n[ovum] generum plantarum Americanarum ...*

15 pp. [in gray paper cover.] n.d. Ca.16–17 × 23 cm

Indices of Plumier's book of 1703 in a hand of the Deschizeaux-type, an alphabetical followed by a systematical list of generic names.

AD 375 RHEEDE TOT DRAAKESTEIN, Hendrik Adriaan van (1635–1691) *Synonima H[orti] Malab[arici]*

12 pp. n.d. Ca.15 × 21 cm

A Deschizeaux-type list of plant names from the first two volumes of van Rheeede tot Draakestein's *Hortus Malabaricus* (1678–1679).

AD 376 SONNERAT, Pierre *Observations sur l'Inde et la Chine*

26 pp. 1776. Ca.19 × 23 cm

The original manuscript of a paper describing Sonnerat's travels and observations during his *voyages*, sent from Canton 29 Dec. 1776, with an accompanying letter [AD 237] to Adanson, received in Aug. 1777.

AD 377 TESSIER, "Abbé" [Henri-Alexandre] *Catalogue des graines que j'ai reçues d'Egypte*
7 pp. n.d. 19 × 25 cm

A list of plant names in French, Egyptian, and Latin of which seeds were received. Annotated by Adanson: "communiqué par l'abbé Tessier," and after the title, "recues d'Egypte de M. Mûre Consul autrefois au Caire at è Alexandrine du tems de mon frère qui ètoit depuis ces Echelles depuis l'ans 1748 (Adanson)."

AD 378 [THÉVENOT, Jean] (1633–1667) *Extrait du voyage des indes manuscrit*

10 pp. n.d. Ca.16 × 21 cm

A Deschizeaux-type abstract of a manuscript which, according to an annotation in the same hand, was "entre les mains de M. Adam de Valencourt[?] medecin. ..." On the cover Adanson wrote of that manuscript, "conservé chez Charaz."

AD 379 TOURNEFORT, Joseph Pitton de (1656–1708) *Abregé de la Methode de tournefort*
[sic] *en françois*

54 pp. n.d. Ca.15 × 19 cm [In vellum cover titled Lettre de Patente.]

A Deschizeaux-type manuscript, an abstract of Tournefort's *Elémens de botanique* (1694), preceded by alphabetic lists of the Latin and French generic names.

AD 380 TOURNEFORT, Joseph Pitton de [*Espèces de Tournefort*]

188 pp. n.d. [Bound in vellum.] Ca.19 × 23 cm

A Deschizeaux-type manuscript of the species names from one of Tournefort's works, possibly his *Institutiones rei herbariae* (1700). The vellum cover bears the handwritten names "Jean Deschizeaux" and "Guillaume Deschizeaux."

AD 381 [TOURNEFORT, Joseph Pitton de] *Table alphiabetique des genres des plantes, avec l'indice de leurs classes, sections, et genres*
18 pp. [probably after 1728.] Ca.14 × 22 cm

A Deschizeaux-type manuscript of an alphabetic list from Tournefort's *Institutiones rei herbariae* (1700) together with a manuscript of his *Corollarium* (1703).

AD 382 TOURNEFORT, Joseph Pitton de [*Herborisations de Paris*] I. II. *Herborisation au dela de la porte de la Conference ...; Bois de Boulogne*
18 pp. n.d. Ca.16 × 21 cm

A Deschizeaux-type manuscript list of the plants found on Tournefort's field trips in the Paris region; the first and second of a series, originally in a hard board cover.

AD 383 TOURNEFORT, Joseph Pitton de [*Herborisations de Paris*] III. *Herborisation des environs de Surene, de St. Cloux et de Seve*
6 pp. n.d. Ca.16 × 21 cm

The third list of Tournefort's field trips in the Paris region, of the Deschizeaux-type of handwriting.

AD 384 TOURNEFORT, Joseph Pitton de [*Herborisations de Paris*] IV. *Herborisation de la porte St. Antoine, Bercy, Charenton, bois de Vincennes, isles de la Marne et St. Maur*
17 pp. n.d. Ca.16 × 21 cm

The fourth list of Tournefort's field trips in the Paris region, of the Deschizeaux-type handwriting. Inside, however, appears the number V.

AD 385 TOURNEFORT, Joseph Pitton de [*Herborisations de Paris*] V. *Herborisation de Gentilli, Arceuil [sic], Cachan, Berny et Antony*
14 pp. n.d. Ca.16 × 21 cm

The fifth list of this series, numbered inside as "IV."

AD 386 TOURNEFORT, Joseph Pitton de [*Herborisations de Paris*] VI. *Herborisations de plus[ieu]rs endroits des environs de Paris*
29 pp. n.d. Ca.16 × 21 cm

The sixth list of the series, with plant names not included in the other five lists.

AD 387 TOURNEFORT, Joseph Pitton de *Plantae quae in propriis locis quaeri debent ex Tournefortio*

24 pp. n.d. Ca.16 × 21 cm

A Deschizeaux-type manuscript list of plant names in alphabetic sequence.

AD 388 TOURNEFORT, Joseph Pitton de *Plantes qui croissent aux environs de Paris*
39 pp. n.d. Bound in vellum with an old date 15 may 1716. Ca.16 × 19 cm

A Deschizeaux-type manuscript of 22 chapters of a Tournefort paper, giving only lists of plant names.

AD 389 TOURNEFORT, Joseph Pitton de *Voyage du Levant de M. Tournefort*
8pp. n.d. Ca.17 × 22 cm

A Deschizeaux-type manuscript of the plant names from Tournefort's travels in Asia Minor.

AD 390 VAILLANT, [Sébastien] (1669–1722) *Remarques sur la methode de Tournefort*
72 pp. n.d. Ca.16 × 22 cm

A Deschizeaux-type manuscript in which Vaillant, the successor to Tournefort, criticizes his botanical ideas.

HERBARIUM SPECIMENS

AD 391 ADANSON, Michel *Monstruosités* [Herbarium].

An herbarium of 75 specimens, unmounted, in brown folders of heavy paper, averaging 26 × 45 cm. The specimens are monstrosities of plants, consisting mainly of plants with supernumerary parts ("double flowers" and similar abnormalities). [Adanson's herbarium specimens are not at the Hunt Institute. Twenty mounted specimens are deposited in the Carnegie Museum of Natural History Herbarium (CM).]
