Homegrown II

October 14, 1974—February 14, 1975

The Hunt Institute is pleased to offer a second exhibition of flower and plant works by artists of the Pittsburgh area. The initial **Homegrown** show was held in the Spring of 1972. The present exhibition is considerably larger than the earlier one and consists mainly of artworks produced since that time.

We have been happily surprised at discovering such an abundance and quality of plant-related art on the local scene and have been encouraged to plan such exhibitions as regular features of our future schedule. The Hunt Institute is grateful for and hereby acknowledges the generous cooperation and suggestions of all the artists involved in **Homegrown II**, as well as the Pittsburgh Plan for Art, the Arts and Crafts Center of Pittsburgh, and Mr. Donald Miller of the Pittsburgh Post-Gazette.
