

HUNTIA

A Journal of Botanical History

Volume 6 Number 2
May 1986

Hunt Institute for Botanical Documentation
Carnegie-Mellon University

Pittsburgh

Huntia is published irregularly, in one or more numbers per volume of approximately 200 pages, by the Hunt Institute for Botanical Documentation, Carnegie-Mellon University, Pittsburgh, PA 15213.

Editor	Robert W. Kiger
Associate Editor	Gavin D. R. Bridson
Assistant Editor	Donna M. Connelly

Subscription rate is \$35.00 per volume. Associates of Hunt Institute may elect to receive *Huntia* as a benefit of membership.

Editorial correspondence, manuscripts and books for review should be addressed to Dr. Kiger at the Institute.

Orders for subscriptions and back issues should be sent to the Institute.

Typeset, printed and bound by Allen Press, Inc., Lawrence, Kansas.

Illustrations in the *Contributions from the U.S. National Herbarium, 1890-1974*

James J. White and Ruth F. Schallert

With few exceptions, the artists associated with the *Contributions from the U.S. National Herbarium* (and with other government publications) are today little known, and their work poorly documented. Here, following a brief history of the National Herbarium and the *Contributions*, we provide an accounting of the scientific illustrations that appeared in the latter during its 85-year span of publication. The relevant plates and figures are listed by artist (Table 1) and the artists are indexed by volume and plate or figure (Table 2).

The Smithsonian Institution included plant specimens among its holdings from the time of its founding in 1846, when collections previously deposited in the National Institute for

the Promotion of Science were turned over to the newly created museum. Among them were specimens from the U.S. South Pacific Expedition under the command of Lt. Charles Wilkes, U.S.N., and from several government-sponsored expeditions to the Far West. Asa Gray, Professor of Botany at Harvard University, was a Regent of the Smithsonian Institution. He and John Torrey, the other leading botanist of the time, took on the task of identifying and curating these plant collections, which for the duration of that effort were housed at Columbia College in New York, where Torrey was a professor. During the ensuing years, the Smithsonian published several monographs based on those studies,

Figure 1. Ink and wash drawing of "*Oenothera xylocarpa* Coville" by Roberta Cowing (active 1887-1920).

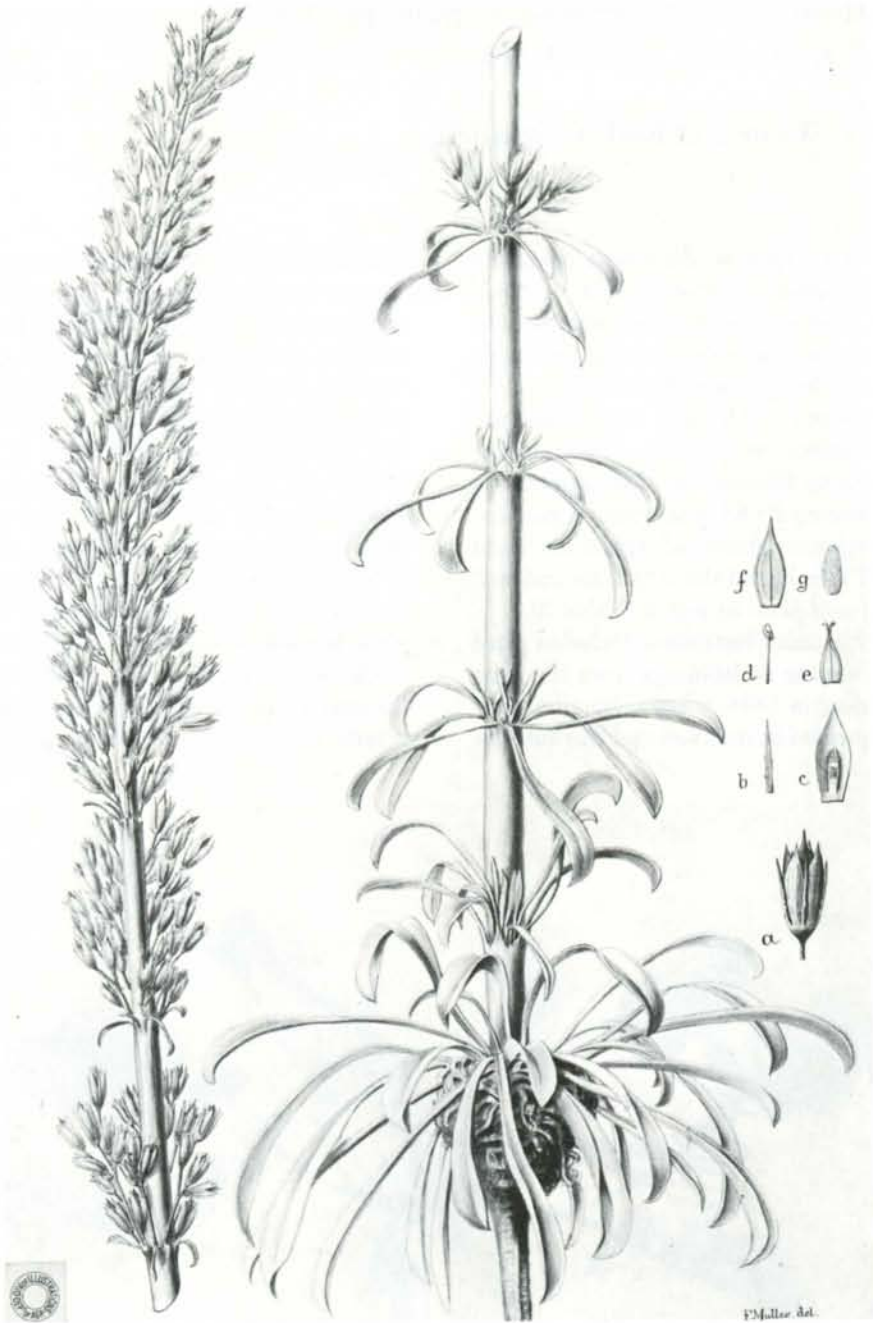

Figure 2. Ink and wash drawing of "*Fraxera tubulosa* Coville" by F. Muller (active 1891-1897).

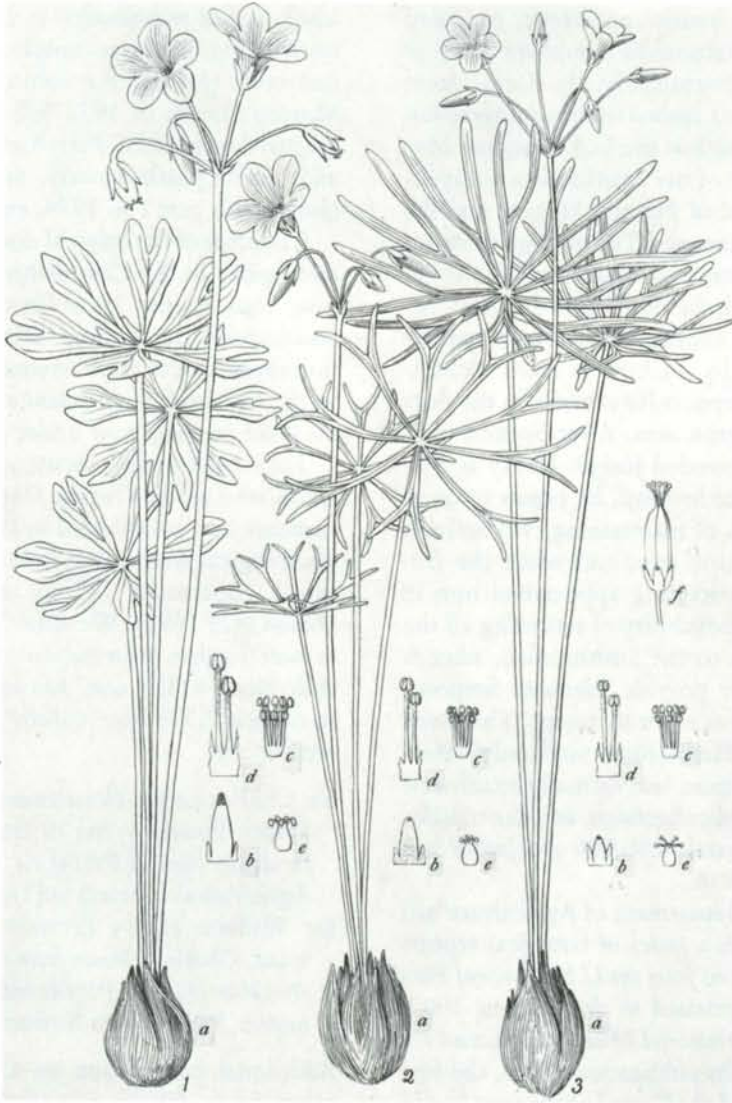

Figure 3. Ink drawing of "*Ionoxalis confusa* Rose, *I. furcata* Rose and *I. jaliscana* Rose" by Frederick A. Walpole (1861–1904).

including Gray's *Plantae Wrightianae Texano-Neo-Mexicanae* (1853–1854), Torrey's *Plantae Fremontianae* (1854) and William Henry Harvey's *Nereis Borealia-Americana* (1852–1858).

In 1868, a few years before his death, Torrey decided that he could no longer take responsibility for curating the plant collections,

and he asked Joseph Henry, the Secretary of the Smithsonian, to take them back. However, there were no suitable quarters for the herbarium in the Smithsonian building and no staff to care for it, so Henry looked elsewhere for a solution. The Department of Agriculture had begun to assemble a herbarium for the

use of its own scientists, and Henry proposed that the two collections be combined and kept at Agriculture. Fortunately, the Department had the room and agreed to the arrangement.

Meanwhile, back at the U.S. National Museum—that part of the Smithsonian comprising the Museum of Natural History and the Museum of History and Technology (now renamed the Museum of American History)—Dr. Lester Ward, the noted paleobotanist, began to assemble another collection of herbarium specimens to aid him in fossil identifications and to support his interest in the flora of the Washington area. After Spencer Fullerton Baird succeeded Joseph Henry as Secretary of the Smithsonian, he began to question the wisdom of maintaining two herbaria in the Washington area, and when the Department of Agriculture approached him in 1894 about the possibility of returning all the plant specimens to the Smithsonian, since it could no longer provide adequate fireproof storage, Baird was eager to accept. The name U.S. National Herbarium, used only informally until that time, was formally established for the combined collections, and the transfer of the approximately 250,000 specimens was completed in 1896.

In 1890 the Department of Agriculture had begun to publish a series of botanical reports titled *Contributions from the U.S. National Herbarium*, and continued to do so until 1902, when the U.S. National Museum assumed responsibility for its publication. Thus, the first seven volumes of the *Contributions* were issued by the Department of Agriculture. In 1968 the Smithsonian Institution Press decided to reorganize and rename a number of its serials, including the *Contributions*, and the first issue of its successor, titled *Smithsonian Contributions to Botany*, appeared the following year. Meanwhile, however, volume 37 of the original series, one devoted to works by Conrad V. Morton, the Department of Botany's distinguished fern specialist, remained unfin-

ished, and it was decided to issue both series until that volume was completed. Eight issues had been planned for volume 37, but Mr. Morton's death in 1972 left the manuscript for part 8 unfinished. Parts 6 and 7 were edited and issued posthumously, and the volume closed with part 7 in 1974, ending the series.

A number of the original drawings for plates and figures in the *Contributions* are on indefinite loan to the Hunt Institute from the Smithsonian Institution. Detailed information about each of these artworks will be found in the *Catalogue of the botanical art collection at the Hunt Institute*, now under publication.

This article complements an earlier one on artists who worked for the Department of Agriculture and contributed to the collection of pomological watercolors now at the U.S. National Arboretum (White and Neumann, *Huntia* 4(2) 1982). We take this opportunity to note further information pertinent to that collection, which now has been determined to contain 7,378 watercolors.¹ Additional references are:

Notes* [National Agricultural Library] 10(1/2): 4, 1984, and for William Henry Prestele—Van Ravenswaay, Charles. *Drawn from nature[:]: The botanical art of Joseph Prestele and his sons*. Washington, Smithsonian Institution Press, 1984.

Additional information on U.S.D.A. artists, some of it kindly provided by Virgil E. McMahan of Washington, D.C., includes:

Boettcher, L. J. (active 1894–1909)²
 Patten, Juliet C. (active 1906–1919?)
 Ridgway, John Livzy (active as early as 1884)
 Riley, Charles Valentine (b. London 1843, d. District of Columbia 1895)

We solicit additional information about any of the U.S.D.A. and *Contributions* artists or their illustrations.

Notes to Tables

1. Original drawing in Hunt Institute Collection.
2. Pl. 16 from *Hortus Cliffortianus*.
3. From tracings by Miss Smith of London; also fig. 16?
4. Original drawing (in part) in Hunt Institute Collection.
5. Pl. 52 from Torrey, *Report of the United States and Mexican Boundary Survey . . .*, 1859.
6. Pl. 2651 from *Hooker's icones plantarum*, vol. 7(3), 1901.
7. Pl. 2676 from *Hooker's icones plantarum*, vol. 7(4), 1901.
8. Pl. 35 from Martius, *Flora Brasiliensis*, 1853.
9. Pl. 81 from Hermann Karsten, *Florae Columbiae*, 1861.
10. Pl. 81 (in part) from Hermann Karsten, *Florae Columbiae*, 1861.
11. Pl. 153 from Eduard F. Poeppig and Stephano Endlicher, *Nova genera ac species plantarum . . .*, 1835.
12. From K. Schumann, *Monatsschrift für Kakteenkunde*, vol. 10, 1900.
13. Pl. 4 (in part) from P. Carolo Plumier, *Nova plantarum Americanarum genera*, 1703.
14. Pl. 38 from Martyn, *Historium plantarum rariorum*, 1728.
15. Pl. 5757 from *Curtis's botanical magazine*, 1869.
16. Pl. 15 from Anders S. Örsted, *L'Amérique Centrale*, 1863.
17. After Pierre Jean François Turpin's pl. 5 in Augusto de Saint-Hilaire, *Flora Brasiliae meridionalis*, 1825.
18. "From Plumier's Catalog, p. 19 (MS. 7, t. 145) [Sherard MS 150, Pl. 161, at University of Oxford]."
19. Pl. 26 from *Trans. Linn. Soc. London*, vol. 10, 1811.
20. Pl. 27 from *Trans. Linn. Soc. London*, vol. 10, 1811.
21. Pl. 1064 from J. D. Hooker, *Hooker's icones plantarum*, 1867-1871.
22. Pl. 4 from D. Dietr., *Syn. pl.*, 1847.

Notes

1. Three artworks previously on indefinite loan to the Hunt Institute have been returned to the pomological collection: William Henry Prestele's 'Satsuma' orange, Royal G. Steadman's 'Shipper's Pride' plum and Deborah G. Passmore's "Eugenia michelii, Surinam Cherry."
2. We have noted a copy of George Vasey's *The agricultural grasses and forage plants of the United States* (Washington, Government Printing Office, 1889) inscribed "for L. J. Boettcher, / Bot. Div. / Agric. Dept / 1894."
