The portrait collection and program, II

Theodore W. Bossert

The first volume of Huntia, published in April 1964, reported under the same heading as above (pp. 174-191), the effort of this library to assemble a collection of portraits of plantmen, doing so on a continuing basis. This was followed by a complete inventory of its portrait holdings, as of 1 August 1963, which at that date included the likenesses of 1,153 persons. It is mentioned there that additions to the collection would be accounted for in subsequent volumes of Huntia.

Since 1 August 1963, and to 31 December 1964, portraits of 2,068 additional personalities in botanical and horticultural fields have been added to this collection. Additions for this period follow.

The information accompanying the name is that described in Huntia 1: 175-176, with the following additional point, that names reported in the earlier volume of Huntia (identified below by an asterisk) are repeated in this supplementary listing only to correct or to supplement data contained in the earlier list.

The entries after each name in the listing provide the following information: (1) year of birth (and of death where applicable) in parentheses, (2) the country of subject’s primary activity or where he is presently located, (3) the medium, or type of likeness (i.e., engraving, photograph), and (4) the number of likenesses in each medium, given in parentheses.

Abbreviations used are as follows:

- Copy—Photo copy, followed by dash and abbreviation of the original medium (e.g., Copy- engr—photo of an engraving).
- Dag—daguerreotype
- Drwg—drawing
- Engr—engraving
- Lith—lithograph
- Phot—photograph
- Pntg—painting

The rapid expansion of this collection could not have been achieved without the hearty interest, cooperation, and often generosity of many
individuals, museums, libraries, educational institutions, botanical and horticultural organizations and societies. This assistance is greatly appreciated and the acknowledgement and gratitude of The Hunt Botanical Library is expressed to all individuals concerned.

Persons or institutions who have supplied a substantial number of the portraits listed below are:

Academy of Natural Sciences, Philadelphia, Pa.
